Dynamics 365 Finance and Supply Chain Management is Microsoft's ERP solution which can be implemented as a cloud or on premise solution to facilitate better decision making with the help of contemporary scalable ERP system tools. This book is updated with the latest features of Dynamics 365 Finance and Supply Chain Management including Chain of Command CoC Acceptance Test Libraries ATL and Business Events. The book not only features more than 100 tutorials that allow you to create and extend business solutions but also addresses specific problems and offers solutions with insights into how they work. This cookbook starts by helping you set up a Azure DevOps project and taking you through the different data types and structures used to create tables. You will then gain an understanding of user interfaces, write extensible code, manage data entities and even model Dynamics 365 ERP for security. As you advance you will learn how to work with various in built Dynamics frameworks such as SysOperation, SysTest and Business Events. Finally you will get to grips with automated build management and workflows for better application state management. By the end of this book you will have become proficient in packaging and deploying end to end scalable solutions with Microsoft Dynamics 365 Finance and Supply Chain Management.

What you will learn

- Understand the importance of using patterns and frameworks for creating unique solutions
- Write code that can make your solution extendable
- Leverage new frameworks that allow your solution to adapt as your business grows
- Design the UI and business logic to fit standard patterns
- Understand how to not only write unit tests but also perform efficient unit testing to automate the testing process
