Migration Development And Transnationalization:

Migration, Development, and Transnationalization Nina Glick Schiller, Thomas Faist, 2010-11-01 The relationship between migration and development is becoming an important field of study yet the fundamentals analytical tools conceptual framework political stance are not being called into question or dialogue This volume provides a valuable alternative perspective to the current literature as the contributors explore the contradictory discourses about migration and the role these discourses play in perpetuating inequality and a global regime of militarized surveillance The assumptions surrounding the asymmetrical transfers of resources that accompany migration are deeply skewed and continue to reflect the interests of the most powerful states and the institutions that serve their interests Those who seek to address the morass of development failure vitriolic attacks on immigrants or sanguine views about migrant agency are challenged by this volume to put aside their methodological nationalism and pursue alternative pathways out of the quagmire of poverty violence and fear that is enveloping the globe

The Migration-Development Nexus Thomas Faist, Margit Fauser, Peter Kivisto, 2011-04-28 This book examines current policy discussions around the migration development nexus and subjects them to rigorous conceptual and empirical criticism through a transnational lens placing the current re discovery of migrants as agents of development nexus into theoretical and historical perspective

Transnational Migration and Human Security Thanh-Dam Truong, Des Gasper, 2011-06-07 The volume places the migration development security nexus in the field of transnational studies Rather than treating these three categories as self evident the essays excavate aspects of power and privilege built into their governing frameworks and conflicting rationales apparent in practices of control Bringing together diverse experiences and case studies the volume highlights the problematic nature of maintaining distinct and disconnected frameworks of governance It argues for a new approach that demonstrates the significance and usefulness of comparative ethics in conceptualising migration from a human centered and gendered perspective in order to address the multi faceted and multi dimensional nature and meanings of security

Migration-Development Nexus, *Transnational Migration-Development Nexus* Mulugeta Bezabih Mekonnen, 2018 With a tenfold increase in remittance flows over the last 25 years the diaspora's role in the development efforts of the global South has gained broader interest Besides financial remittances flows of skills and social remittances have gained attention particularly the relevance of diaspora associations as drivers of development This book explores the engagement of Ethiopian diaspora associations in Germany for their home country's development It investigates the policies of the Ethiopian and Germany governments and the opportunities the policies generate for diaspora engagement efforts

Transnational Migration Thomas Faist, Margit Fauser, Eveline Reisenauer, 2013-04-03 Increasing interconnections between nation states across borders have rendered the transnational a key tool for understanding our world It has made particularly strong contributions to immigration studies and holds great promise for deepening insights into international migration This is the first book to provide an accessible yet rigorous

overview of transnational migration as experienced by family and kinship groups networks of entrepreneurs diasporas and immigrant associations As well as defining the core concept it explores the implications of transnational migration for immigrant integration and its relationship to assimilation By examining its political economic social and cultural dimensions the authors capture the distinctive features of the new immigrant communities that have reshaped the ethno cultural mix of receiving nations including the US and Western Europe Importantly the book also examines the effects of transnationality on sending communities viewing migrants as agents of political and economic development This systematic and critical overview of transnational migration perfectly balances theoretical discussion with relevant examples and cases making it an ideal book for upper level students covering immigration and transnational relations on sociology political science and globalization courses

Unravelling Migrants as Transnational Agents of Development Thomas Faist,Nadine Sieveking,2011 Since the early 2000s there has been an increased interest in international migration as a central mechanism to advance what is called the development potential of international migrants The contributions in this book argue that the current enthusiasm about the migration development nexus should be approached from a perspective that recognizes and critically appraises the emergence of a new agent in development discourse variably called migrants diaspora or transnational community The essays which are the result of intensive student research at Bielefeld University depart from

issues raised by the migration development nexus and ask how life worlds and institutions are changing in the face of cross border processes In this way the book is also a contribution to the different understandings of development Series Politik Gemeinschaft und Gesellschaft in einer globalisierten Welt Vol 11 *Characteristics of Temporary Migration in European-Asian Transnational Social Spaces* Pirkko Pitkänen, Mari Korpela, Mustafa Aksakal, Kerstin Schmidt, 2017-10-05 This book focuses on the experiences of temporary movements between Asia and Europe from the perspective of migrants and mobile people It raises important questions such as Why do people migrate on a temporary basis and what does this actually mean How are these trajectories shaped What are the implications of temporary moves for migrants and non migrants And how are transnational ties and practices characterized in the context of temporary migration By shedding light on the practices and experiences of individual migrants the book provides useful insights into understanding the challenges arising in an increasingly interconnected and mobile world The chapters indicate that temporary migratory movements are on the rise on the one hand on a voluntary basis such as reflected in labour migration lifestyle migration and international student mobility and on the other hand in an involuntary way as expressed in different forms of forced migration Either way temporary migration has diverse political legal economic social and cultural implications including the emergence of novel transnational networks and practices The book is based on the findings of the international research project Transnational Migration in Transition Transformative Characteristics of Temporary Mobility of People EURA NET funded by the European Union s 7th Framework Programme for period 2014 2017 Transnational Labour Migration, Remittances and the Changing Family in Asia L. Hoang, B. Yeoh, 2015-05-13 The contributors investigate the inter relationships between migrant remittances and the family in Asia They argue that in the context of Asian transnational labour migration where remittances tend to become a primary currency of care the making or breaking of the family unit is mainly contingent on how individuals handle remittance processes **Transnational Return and Social Change** Remus Gabriel Anghel, Margit Fauser, Paolo Boccagni, 2019-07-31 Return has long been considered the end of a migration cycle Today returnees continued transnational ties practices and resources have become increasingly visible Transnational Return and Social Change joins what is now a growing field of research and suggests new ways to understand the dynamics of return migration and the social changes that come along It pays tribute to the meso level impacts that follow the practices and resources migrant returnees mobilize across borders With a particular focus on the meso level the book takes up the challenge of transnational research and enquires into the consequences of return for local communities organizations social networks and groups Presenting a collection of case studies dedicated to migrations across Europe and beyond this book contributes new insights into the societal impact of migration in pluralized societies *Routledge Handbook of Migration and Development* Tanja Bastia, Ronald Skeldon, 2020-02-14 The Routledge Handbook of Migration and Development provides an interdisciplinary agenda setting survey of the fields of migration and development bringing together over 60 expert contributors from around

the world to chart current and future trends in research on this topic The links between migration and development can be traced back to the post war period if not further yet it is only in the last 20 years that the migration development nexus has risen to prominence for academics and policymakers Starting by mapping the different theoretical approaches to migration and development this book goes on to present cutting edge research in poverty and inequality displacement climate change health family social policy interventions and the key challenges surrounding migration and development While much of the migration literature continues to be dominated by US and British perspectives this volume includes original contributions from most regions of the world to offer alternative non Anglophone perspectives Given the increasing importance of migration in both international development and current affairs the Routledge Handbook of Migration and Development will be of interest both to policymakers and to students and researchers of geography development studies political science sociology demography and development economics

The Migration-Development Regime Rina Agarwala,2022 A sweeping history of how India has used its poor and elite emigrants to further Indian development and how Indian emigrants have reacted resisted and re shaped India s development in response How can states and migrants themselves explain the causes and effects of global migration The Migration Development Regime introduces a novel analytical framework to help answer this question in India the world s largest emigrant exporter and the world s largest remittance receiving country Drawing on an archival analysis of Indian government documents an original data base of Indian migrants transnational organizations and over 200 interviews with poor and elite Indian emigrants recruiters and government officials this book exposes the vital role the Indian state from the colonial era to the present day has long played in forging and legitimizing class inequalities within India through the management of international emigration It also exposes how poor and elite emigrants have differentially resisted and re shaped state emigration practices over time By taking a long and class based view this book recasts contemporary migration not simply as a problematic function of neoliberalism or as a development panacea for sending countries but as a dynamic historical process that sending states and migrants have long used to shape local development In doing so it re defines the primary problems of global migration exposes the material and ideological impact that migration has on sending state development and isolates what is truly novel about contemporary migration

yet been sufficiently studied

Migrant Transnationalism Özge Bilgili, Marta Bivand Erdal, 2025-07-22 This open access short reader provides a compelling introduction to research on migrant transnationalism. The short reader focuses on the significant area of remittances in financial terms. However, attention is also paid to political, social, cultural, and religious transfers and exchanges, underscoring the salience of the wide range of ties that are maintained across borders. Increasingly, such ties are sustained through virtual and technology-facilitated modes of interaction. Drawing on established and recent empirical research from across the globe in dialogue with scholars of migrant transnationalism, the book offers an overview of approaches, conceptual tools, thematic areas, and methods of investigation. Thus, this short reader sheds light on the fundamentals of existing knowledge on migrant transnationalism. What are the key questions in migrant transnationalism research today? How does a transnational perspective deepen our understanding of migration, social mobility, diversity, inclusion, and development? As a source for researchers, students, and policy makers, this short reader is essential reading which shows why looking at the world through a transnational lens adds value for anyone interested in migration and social change.

International Migration and Development in South Asia Md Mizanur Rahman, Tan Tai Yong, 2015-04-10 In migration studies, the nexus between migration and development in the global South has been meticulously debated. However, a unanimous resolution to this debate has not been found due to the ever-changing nature of international migration. This book advances knowledge on the global debate on the migration-development relationship by documenting experiences in a number of countries in South Asia. Drawing on the experiences of global South Asians, this volume documents the impact of migration on the social, economic, and political fields in the broader context of development. It also presents a regional experience by looking into the migration-development nexus in the context of South Asia and analyses the role South Asian migrants and diaspora communities play in the South Asian society. Contributions from a variety of disciplinary backgrounds, including sociology, anthropology, political science, international relations, and economics, document the development implications of South Asian migration. Broad in scope in terms of contents, timeline of migration, and geographical coverage, the book presents empirically based case studies involving India, Bangladesh, Sri Lanka, Pakistan, and Nepal and their emigrants living and working in different parts of the world. Going beyond reporting the impacts of migration on economic development by highlighting the implications of social development on society, this book provides a fascinating contribution to the fields of Asian Development, Migration Studies, and South Asian Studies.

The Transnational State Thomas Lacroix, 2024-05-23 This work in two parts examines the relations between transnational societies and states. The second volume of this work contends that current policies meant to control or enhance transnational flows have led to the emergence of a transnational policy apparatus, coined the transnational state. This book proposes an innovative conceptual framework to grasp the transformations of the contemporary state in both sending and receiving countries. It shows how states expand beyond national territorial limits by reaching out to migrants where they are. In response to the migrants

endeavours to circumvent the constraints imposed by selective migration policies public authorities expand the reach of their control beyond externalisation within internalisation and at expansion borders A totalitarian temptation seems to have seized contemporary state bureaucracies affecting the very nature of borders and societies The core argument of this research is that the development of the transnational state is not random It is a process shaping and shaped by the structures of the transnational society

Aging within Transnational Families Vincent Horn, 2019-03-15 *Aging within Transnational Families* is the first book to provide a multi method approach to studying aging across borders By asking how why and to what extent do older Peruvians engage in transnational family ties and practices the book enhances our knowledge about aging across borders Drawing on the care circulation framework and the capacity and desire approach it explores the motivations of older Peruvians transnational involvement as well as the factors influencing the scope and propensity of their cross border practices From a lifecourse perspective the book asks how age relates to older Peruvian migrants integration into the host society and engagement in the sending of remittances and visits of family members in Peru Exploring the prevalence and structuring features of family related transnational practices against the backdrop of different migration regimes *Aging within Transnational Families* shows how policies affect transnational family configurations and the role of older people within them
