Edelstein,2013-11-05 Total Propaganda moves the study of propaganda out of the exclusive realm of world politics into the more inclusive study of popular culture media and politics All the participatory functioning elements of the society are aspects of membership in the popular culture Thus the values of popular music media politics debates over social issues and even international trade become everyday propaganda to which everyone may relate To emphasize the necessity for new thinking about propaganda Edelstein creates the concepts of the new propaganda and the old and he devises a language of unonyms to convey their meanings more quickly Oldprop is characteristic of mass cultures and utilizes totalitarian methods of conflict hegemony minimization demonization and exclusiveness to achieve its goals By contrast newprop is created by members of the popular culture to allow them to engage in accomodation enhance the individual and promote inclusiveness Shifts in the old and the new propaganda are tracked across social issues such as race religion sexuality gender gun control and the environment as well as in fashion politics advertising sports media and politics Central to the concept of total propaganda is that it is not simply additive it is the product of new energies that are produced by the fusing of propaganda in such related forums as music art advertising sports and politics It is these synergies and their production of new energies that make total propaganda greater than the sum of its parts Edelstein concludes that the most important distinction that should be drawn between mass culture and popular culture is its text i e its propaganda In a popular culture everyone creates and consumes propaganda in a mass culture almost everyone consumes it but only a few create it This formulation offers new ways to discuss power and ideology in media texts As an example where once the least informed and the least educated were the most subject to propaganda now the most informed and most educated often are the first to create propaganda and the first to consume it     **Inside Microsoft SharePoint 2013** Scot Hillier,Ted Pattison,Mirjam van Olst,Andrew Connell,2013-11-15 Build custom SharePoint solutions with architectural insights from the experts Take a deep dive into SharePoint 2013 and master the intricacies for designing and implementing robust apps and other business solutions for your organization Led by an author team with in depth knowledge of SharePoint architecture you ll thoroughly explore the SharePoint 2013 development platform and new app model through hands on tasks and extensive code samples Discover how to Create SharePoint hosted provider hosted and autohosted apps Master the new app security model with
