Springer Handbook of Robotics Bruno Siciliano, Oussama Khatib, 2008-05-20 With the science of robotics undergoing a major transformation just now Springer s new authoritative handbook on the subject couldn t have come at a better time Having broken free from its origins in industry robotics has been rapidly expanding into the challenging terrain of unstructured environments Unlike other handbooks that focus on industrial applications the Springer Handbook of Robotics incorporates these new developments Just like all Springer Handbooks it is utterly comprehensive edited by internationally renowned experts and replete with contributions from leading researchers from around the world The handbook is an ideal resource for robotics experts but also for people new to this expanding field

Industrial Robots Programming J. Norberto Pires, 2007-04-03 Industrial Robots Programming focuses on designing and building robotic manufacturing cells and explores the capabilities of today s industrial equipment as well as the latest computer and software technologies Special attention is given to the input devices and systems that create efficient human machine interfaces and how they help non technical personnel perform necessary programming control and supervision tasks Drawing upon years of practical experience and using numerous examples and illustrative applications J Norberto Pires covers robotics programming as it applies to The current industrial robotic equipment including manipulators control systems and programming environments Software interfaces that can be used to develop distributed industrial manufacturing cells and techniques which can be used to build interfaces between robots and computers Real world applications with examples designed and implemented recently in the lab Industrial Robots Programming has been selected for indexing by Scopus For more information about Industrial Robotics please find the author s Industrial Robotics collection at the iTunesU University of Coimbra channel

Introduction to Robotics Phillip McKerrow, 1991 This book provides an introductory text for students coming new to the field of robotics and a survey of the state of the art for professional practitioners Some of the outstanding features of this book include A unique approach which ties the multi disciplinary

components of robotics into a unified text Broad and in depth coverage of all the major topics from the mechanics of movement to modelling and programming Rigorous mathematical treatment of mature topics combined with an algorithmic approach to newer areas of research Practical examples taken from a wide range of fields including computer science electronic engineering mechanical engineering and production engineering Step by step development of problems and many worked examples

Research and Education in Robotics - EUROBOT 2009 Achim Gottscheber, David Obdrzalek, Colin Schmidt, 2010-10-19 This volume contains the accepted papers presented during the International Conference on Research and Education in Robotics EUROBOT Conference 2009 held in La Fert e Bernard France May 21 23 2009 Today robots are indispensable tools for exible automated manufacturing in many areas of industry as well as for the execution of sophisticated or d gerous tasks in the nuclear industry in medicine and in space technology and last but not least they are being increasingly used in everyday life To further encourage research in this area the EUROBOT Conferences have been set up They aim to gather researchers and developers from academic elds and industries worldwide to explore the state of the art This conference is companied by the EUROBOT Contest Finals an international amateur robotics contest open to teams of young people During the nals in 2009 teams from 25 countries came together not only to compete but also to exchange knowledge and ideas and to learn from each other In addition to the paper and poster presentations there were two invited talks Raja Chatila Director of the LAAS CNRS Toulouse France whose talk was about Cognitive Robots V eronique Raoul EUROBOT Association France whose talk was about EUROBOT Organizing a conference is a task that requires the collaboration of many p ple We personally would like to warmly thank all members of the EUROBOT Conference 2009 program committee without their help and dedication it would not have been possible to produce these proceedings
