Digital Material Ann-Sophie Lehmann, Joost Raessens, Mirko Tobias Schäfer, Marianne Boomen, 2025-10-01. Three decades of societal and cultural alignment of new media have yielded a host of innovations, trials, and problems accompanied by versatile popular and academic discourse. New Media Studies crystallized internationally into an established academic discipline, and this begs the question: where do we stand now? Which new questions are emerging now that new media are being taken for granted and which riddles are still unsolved? Is contemporary digital culture indeed all about you, the participating user, or do we still not

really understand the digital machinery and how this constitutes us as you The contributors to the present book all employed in teaching and researching new media and digital culture assembled their digital material into an anthology covering issues ranging from desktop metaphors to Web 2 0 ecosystems from touch screens to blogging and e learning from role playing games and cybergothic music to wireless dreams Together the contributions provide a showcase of current research in the field from what may be called a digital materialist perspective A compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society
