Marianne Kédia, Aurore Sabouraud-Séguin, 2020-07-16 La psychotraumatologie connaît un essor important depuis quelques années. Pourtant de nombreux étudiants et praticiens se sentent encore perdus dans la multiplicité d'approches de concepts et de thérapies. En 51 notions dont 26 chapitres inédits et la lumière des derniers changements nosographiques et des avancées scientifiques récentes cette troisième édition se propose de revenir sur les aspects conceptuels et thérapeutiques essentiels du domaine autour de 4 axes : les fondements de la discipline les différents types de traumatismes et leurs conséquences spécifiques la psychopathologie travers les troubles proprement posttraumatiques et ceux qui y sont fréquemment associés les thérapies et leur application au champ du trauma Rédigé par des cliniciens expérimentés chaque chapitre traite des questions théoriques et pratiques essentielles. Cet aide-mémoire offre un panorama actualisé et complet du psychotrauma Le trauma et le langage Yann Auxéméry, Frédérique Gayraud, 2025-04-23 Les psychothérapies opèrent dans ces actes de langage qui harmonisent nos rapports de signification. Du langage blessé par le trauma au langage thérapeutique comment s'assurer de prononcer les bons mots ceux qui vont vraiment soigner. L'analyse psycholinguistique propose d'y répondre tout en permettant de mieux comprendre la singularité d'un sujet. Dans cet ouvrage les auteurs présentent les résultats innovants de leurs recherches scientifiques concernant le repérage et l'apaisement des blessures psychiques grâce à une lecture psycholinguistique. Le chapitre 1 décrit la clinique des troubles psychiques post-traumatiques actuels en précisant les différentes typologies de traumatismes existants. La conclusion de ce chapitre invite à la nécessité de construire un nouveau modèle permettant de mieux comprendre la structuration des traumatismes afin de mieux les soigner. Dans le chapitre 2 après une revue critique de la littérature internationale concernant le langage des personnes blessées psychiquement les auteurs décrivent un nouveau syndrome le syndrome psycholinguistique traumatique. Le chapitre 3 identifie les mécanismes thérapeutiques portés par le langage en abordant les mots et les phrases comme des outils visant à soigner. Le chapitre 4 décrit certaines prises en soin : premiers secours psychologiques, debriefing, puis soins de psychothérapie avec des retranscriptions de séquences thérapeutiques en décrivant les fonctions de la parole. Dans le chapitre 5 les auteurs expliquent comment cette nouvelle compréhension linguistique des traumatismes permet de mieux mettre en évidence les processus psychothérapeutiques efficaces. Pour conclure les auteurs questionnent l'avenir de la psychothérapie à l'heure de l'intelligence artificielle. **16 LECONS SUR LE TRAUMA** CROCQ LOUIS., 2012 **Psychotraumatologie** Marianne Kédia, Aurore Sabouraud-Séguin, 2020-07-16 Traiter les traumatismes psychiques - 3e éd. François Lebigot, 2021-01-20 Le concept de Post Traumatic Stress Disorder (PTSD) ne rend compte ni de ce qu'est un trauma, assimilable à un stress plus important que les autres, par le vécu qu'il génère ni des conséquences long terme du traumatisme. Il en résulte que le maigre savoir qui découle de cette conception n'est d'aucune utilité.

pour le traitement qui vise la guérison du sujet traumatisé. En s'appuyant sur la conception freudienne du traumatisme et sur la richesse clinique des descriptions de ses successeurs, ce livre montre comment une conception rigoureuse des bouleversements que l'effraction détermine dans l'appareil psychique conduit des attitudes thérapeutiques adaptées. Cette nouvelle édition introduit des éléments majeurs pour une compréhension actuelle des psychopathologies : la critique de la notion de stress ouvrant sur une révolution sémantique, la nécessaire prise en compte du trauma en tant que négative.

Le traumatisme psychique chez l'adulte Elisabetta Dozio, Mathilde Laroche Joubert, Thierry Baubet, 2020-01-15. Deuil, effroi, traumatisme individuel ou collectif. Quels sont les effets du traumatisme psychique chez l'adulte ? Quelles sont ses particularités ? Quels dispositifs de soin proposer face à cette clinique de l'extrême ? Comment innover et créer pour chaque patient ? 12 fiches de cet ouvrage interrogent la clinique du traumatisme, les classifications psychiatriques, les traumatismes collectifs, l'impact du trauma intentionnel et non intentionnel, le contexte humanitaire. Enfin sont abordées les multiples prises en charge thérapeutique individuelle, de groupe, hypnose.

Psychotraumatologie Louis Jehel, Gérard Lopez, 2006. La psychotraumatologie, trop souvent confondue avec la victimologie, dont elle constitue la partie médico-psychologique, se consacre l'étude des conséquences et au traitement des traumatismes psychiques. Cet ouvrage débute par l'évaluation et les outils de la recherche. Il aborde ensuite la clinique des adultes et des enfants, avant de dresser le panorama des traitements, interventions précoces et thérapeutiques qui bénéficient d'un haut niveau de preuve d'efficacité. Les auteurs professionnels des différentes formes de pratiques soignantes en psychotraumatologie et enseignants du DU de Psychotraumatologie Paris V proposent une synthèse des connaissances internationales et de leurs pratiques de cliniciens expérimentés. Ils prennent des actions transdisciplinaires qui renforcent le travail en réseau. Premier ouvrage professionnel de synthèse, *Psychotraumatologie* est un véritable manuel très utile pour tous ceux qui interviennent dans l'aide médico-psychologique ou sociale auprès de personnes souffrant de psychotraumatisme : psychologues, psychiatres, psychothérapeutes, médecins généralistes, infirmiers, assistants sociaux.
