**Mountain Geography - A Critique And Field Study** Roderick Peattie, 2013-05-31 This antiquarian book contains a comprehensive critique and field study of mountain geography Complete with a wealth of tables diagrams photographs and interesting information this is a text that will greatly appeal to anyone with an interest in the subject of geography or mountains more specifically The chapters of this book include Mountain Temperatures Humidity and Precipitation Winds Clouds and Sun Vegetation Zones and The Height Limits of Fields Forests and Their Significance Alpine Pastures and Alpine Economy Land Utilization and Economics etcetera Many antiquarian books such as this are becoming increasingly hard to come by and expensive and it is with this in mind that we are republishing this book in an affordable modern edition complete with a specially commissioned new biography of the author *Mountain Geography* Martin F. Price, 2013-08-24 Mountain Geography is a comprehensive resource that gives readers an in depth understanding of the geographical processes that occur in the world s mountains and the impact of these regions on culture and society The volume begins with an introduction that defines mountains followed by a comprehensive treatment of their physical geography including origins climatology snow and ice landforms and geomorphic processes soils vegetation and wildlife The concluding chapters discuss the human geography of mountains and our attitudes toward them populations in the mountain regions and their livelihoods and interactions within dynamic environments the diversity of mountain agriculture and the challenges of sustainable mountain development Book Jacket Performing Mountains Jonathan Pitches, 2020-04-02 Launching the landmark Performing Landscapes series Performing Mountains brings together for the first time Mountain Studies and Performance Studies in order to examine an international selection of dramatic responses to mountain landscapes Moving between different registers of writing the book offers a critical assessment of how the cultural turn in landscape studies interacts with the practices of environmental theatre and performance Conceived in three main parts it begins by unpicking the layers of disciplinary complexity in both fields before surveying the rich history and practice of rituals playtexts and site specific works inspired by mountains The last section moves to a unique analysis of mountains themselves using key concepts from performance training scenography acting and spectatorship Threaded throughout is a very personal tale of mountain research offering a handrail or alternative guide through the book **Safeguarding Mountain Social-Ecological Systems, vol. 1** Stefan Schneiderbauer, Paola Fontanella Pisa, John F. Shroder, Jorg Szarzynski, 2023-12-01 Safeguarding Mountain Ecosystems A Global Challenge provides an overview of the relevant research in mountain regions worldwide identifying existing challenges and providing an understanding of the diversity of mountain ecosystems in different regions Mountain ecosystems are increasingly vulnerable to modified climate conditions and other global changes demographic migration urbanization In this time of change efforts for sustainable development in mountain ecosystems deserve all the attention especially in synergy with the United Nations International Frameworks including the Sustainable Development

Agenda 2030 the Sendai Framework for Disaster Risk Reduction the Paris Agreement and the New Urban Agenda Sections underline the importance of mountain regions for humanity at global regional and local scales describe the challenges of safeguarding mountains and possible solutions worldwide and scrutinize regional specificities of the major mountain ranges describing the challenges and opportunities of each Final sections reflect on applications and technologies that address and solve major problems Focuses on existing challenges for mountain regions around the world Presents specific case studies of mountain ecosystems from major mountain ranges Features contributions from representatives of UN Agencies and research experts from the addressed regions offering a very interdisciplinary view on challenges and opportunities

**Safeguarding Mountain Social-Ecological Systems, Vol 2** Stefan Schneiderbauer, Jorg Szarzynski, Paola Fontanella Pisa, John F. Shroder, 2024-08-13 Safeguarding Mountain Social Ecological Systems Volume Two Building Transformative Resilience in Mountain Regions Worldwide presents an overview of the relevant research in mountain regions worldwide identifies existing challenges and provides an understanding of the diversity of mountain ecosystems in different regions It focuses on understanding protecting and enhancing mountain social ecological systems This second volume places a stronger emphasis on building transformative resilience in mountain regions indicating a focus on proactive measures to address challenges and promote sustainable development It also highlights regional perspectives and case studies and insights from various mountain regions worldwide Focuses on existing efforts emerging risks and collaborative initiatives in the field of mountain social ecological systems Allows readers to gain insights into diverse social ecological systems and understand the unique challenges and opportunities associated with each region Explores strategies and approaches to enhance the resilience of mountain social ecological systems through case studies insights and opportunities presented in each region

Mountain Lexicon Fausto O. Sarmiento, Alexey Gunya, 2024-09-01 This book is the second volume in a series on montology dedicated to the transdisciplinary reflection of mountain research considering the diversity of views on mountains and their problemata in the context of rapid technological development and unprecedented accumulation and dissemination of information around the world The necessity for a new orderly and structured lexicon arose from the need to critically reassess the colonial past in the development of mountain territories the development of a new and alternative understanding of mountain topics in the light of decolonized epistemology The creation of coordinated and ordered terms for the main parts of mountain research creates the basis for an unorthodox understanding of the ontology of mountains and helps to better understand the complex cultural and natural essence of mountain socio ecological systems At the same time a local episteme of mountains considering local values small scales and vernacular visions are of particular importance which must be taken into account in the current terminology The purpose of the book is to provide methodological support for montology as a convergent and transdisciplinary science of mountains based on the harmonization of its terminological base The book pays special attention to onomastics toponymy standardization and other nuances of terms used in mountain research According to this goal three

dozen articles in a relatively small format about 3 pages vividly attractively and innovatively reflect the modern view of one or more related terms Articles include definition s of the term description of etymology onomastics or toponymy used examples of local characteristics compared to traditional sources possible vernacular terms Articles are grouped into four main areas 1 Basic glossary of montology terminology 2 Towards mountain socio ecological systems 3 Innovative disciplinary systemic realm 4 Mountain classifications onomastics critical toponymy and rediscovery of meaning The authors of the articles are leading experts in the field of mountain research from around the world The book is intended for scientists experts and teachers It is provided with an annotated list of the most important montology terms

**Archaeology of Mountain Landscapes** Arnau Garcia-Molsosa,2023-10-01 Mountains contain a rich and diverse set of remnants left by human societies They have been inhabited since prehistory and have been transformed by human activity during prehistorical and historical times and that history defines mountain landscapes as we know them today Archaeology of Mountain Landscapes contains twenty contributions by forty one specialists currently researching mountain areas in the Americas Asia and Europe The different case studies address the subject diachronically ranging from prehistory to modern times and employ a variety of methodological strategies including archaeological surveys and excavation paleoenvironmental studies and historical and ethnographical research This volume demonstrates how multidisciplinary archaeological fieldwork is radically changing our vision of mountain landscapes Viewing mountain landscapes as archaeological documents contributes to our understanding of the history of mountain environments and offers new archaeological datasets to use in the interpretation of human societies Taken together the essays collected here offer a comprehensive view of current research and suggest new directions for future study

**Continuity and Change in Cultural Adaptation to Mountain Environments** Ludomir R Lozny,2013-03-12 Up until now mountain ecosystems have not been closely studied by social scientists as they do not offer a readily defined set of problems for human exploitation as do for instance tropical forests or arctic habitats But the archaeological evidence had shown that humans have been living in this type of habitat for thousands of years From this evidence we can also see that mountainous regions are often frontier zones of competing polities and form refuge areas for dissident communities as they often are inherently difficult to control by centralized authorities As a consequence they fuel or contribute disproportionately to political violence But we are now witnessing changes and increasing vulnerability of mountain ecosystems caused by human activities Human adaptability to mountain ecosystems This volume presents an international and interdisciplinary account of the exploitation of and human adaptation to mountainous regions over time The contributions discuss human cultural responses to key physical and cultural stressors associated with mountain ecosystems such as aridity quality of soils steep slopes low productivity as well as transient phenomena such as changing weather patterns deforestation and erosion and the possible effects of climate change This volume will be of interest to anthropologists ecologists and geologists as mountainous landscapes change fast and cultures disappear and they

need to be recorded and mountain regions are of interest for studies on environmental change and cultural responses of mountain populations provide clues for us all Critical to understanding mountain adaptations is our comprehension of human decision making and how people view short and long term outcomes

**High Mountain Pastoralism in Northern Pakistan** Eckart Ehlers, Hermann Kreutzmann, 2000 The strength of the book lies in this differentiated analysis which is based on extensive empirical research Several chapters challenge conventional modernization theories and the authors intimate connection to their data makes for an unusually stimulating and pleasurable read

**The Mountain** Bernard Debarbieux, Gilles Rudaz, 2015-09-10 From the Enlightenment to the present day and using a variety of case studies from all the continents the authors show us how our ideas of and about mountains have changed with the times and how a wide range of policies from border delineation to forestry as well as nature protection and social programs have been shaped according to them A rich hybrid analysis of geography history culture and politics Jacket

**Space, Place and Religious Landscapes** Darrellyn Gunzburg, Bernadette Brady, 2020-10-01 Exploring sacred mountains around the world this book examines whether bonding and reverence to a mountain is intrinsic to the mountain constructed by people or a mutual encounter Chapters explore mountains in England Scotland Wales Italy Ireland the Himalaya Japan Greece USA Asia and South America and embrace the union of sky landscape and people to examine the religious dynamics between human and non human entities This book takes as its starting point the fact that mountains physically mediate between land and sky and act as metaphors for bridges from one realm to another recognising that mountains are relational and that landscapes form personal and group cosmologies The book fuses ideas of space place and material religion with cultural environmentalism and takes an interconnected approach to material religio landscapes In this way it fills the gap between lived religious traditions personal reflection phenomenology historical context environmental philosophy myths and performativity In defining material religion as active engagement with mountain forming and humanshaping landscapes the research and ideas presented here provide theories that are widely applicable to other forms of material religion

Cooperation for a Peaceful and Sustainable World Chen Bo, Manas Chatterji, Hou Na, 2012-12-11 Over the years a considerable amount of work has been conducted in the field of peace studies conflict management peace science in economics sociology anthropology and management This title presents research by scholars with an emphasis on theoretical and mathematical constructs in the area of peace economics and peace science

**No Friends but the Mountains** Judith Matloff, 2017-03-07 A veteran war correspondent journeys to remote mountain communities across the globe from Albania and Chechnya to Nepal and Colombia to investigate why so many conflicts occur at great heights Mountainous regions are home to only ten percent of the world s population yet host a strikingly disproportionate share of the world s conflicts Mountains provide a natural refuge for those who want to elude authority and their remoteness has allowed archaic practices to persist well into our globalized era As Judith Matloff shows the result is a combustible mix we in the lowlands cannot afford to ignore Traveling to conflict zones across the world she

introduces us to Albanian teenagers involved in ancient blood feuds Mexican peasants hunting down violent poppy growers and Jihadists who have resisted the Russian military for decades At every stop Matloff reminds us that the drugs terrorism and instability cascading down the mountainside affect us all A work of political travel writing in the vein of Ryszard Kapuscinski and Robert Kaplan No Friends but the Mountains is an indelible portrait of the conflicts that have unexpectedly shaped our world

Pamirian Crossroads and Beyond Hermann Kreutzmann, 2024-08-05 In Pamirian Crossroads and Beyond Hermann Kreutzmann offers insights in his fieldwork based research in High Asia during four decades A human geographical perspective is pursued in which case studies about colonial and post colonial boundary making exchange relations of mountain communities across international borders the transformation of agricultural and pastoral practices and the effects of modernisation strategies in neighbouring countries are centred in the Hindukush Wakhan Quadrangle Pamirian Crossroads Karakoram Mountains and Himalaya Empirical evidence is augmented by in depth archival research thus allowing a perspective from the 19th to the 21st century By shifting the focus to mountain peripheries and emphasising spaces in between urban centres of power in Afghanistan Pakistan China and the Central Asian Republics different arenas of confrontation and effective changes emerge
