bloque debe abordarse de manera integrada para permitir descubrir las relaciones entre sistemas y las ventajas e inconvenientes de cada uno. Además es conveniente potenciar la utilización del dibujo a mano alzada como herramienta de comunicación de ideas y análisis de problemas de representación. El tercer bloque la Normalización pretende dotar al estudiante de los procedimientos para simplificar, unificar y objetivar las representaciones gráficas. Está especialmente relacionado con el proceso de elaboración de proyectos, objeto del último bloque, por lo que aunque la secuencia establecida sitúa este bloque de manera específica en el primer curso, su condición de lenguaje universal hace que su utilización sea una constante a lo largo de la etapa. El cuarto bloque denominado Proyectos tiene como objetivo principal que el estudiante movilice e interrelacione los contenidos adquiridos a lo largo de toda la etapa y los utilice para elaborar y presentar de forma individual y colectiva los bocetos, croquis y planos necesarios para la definición de un proyecto sencillo relacionado con el diseño gráfico industrial o arquitectónico.

Dibujo técnico - Enciclopedia. Francisco Javier Rodríguez de Abajo, Víctor Álvarez Bengoa, 2012-07-25. El aprendizaje del Dibujo Técnico ha supuesto siempre un exceso bibliográfico cuya labor de recopilación dificultaba su concreción. Los autores han pretendido cubrir este vacío con una obra que inicie y complete el estudio del Dibujo Técnico rigurosamente actualizado en la Normalización y desarrollado con carácter práctico. Los primeros diez temas son un resumen práctico de la teoría del Dibujo. La parte central recoge los temas de Normalización más importantes de acuerdo a las normas UNE y a las normas internacionales y la última parte consta de ejercicios prácticos a los que se ha dedicado especial interés dado el carácter de esta obra.
