## **Of Tigers And Men Entering The Age Of Extinction:**

**Of Tigers and Men** Richard Ives, 2012-12-05 We have entered the age of extinction Soon many of the animal kingdom's most extraordinary creatures will no longer roam free hunted and hounded out of existence including one of its most magnificent denizens the wild tiger It was this sobering realization of impending tragedy that inspired naturalist and safari leader Richard Ives to embark on a stirring adventure and spiritual journey across India Nepal and Southeast Asia meeting enigmatic wanderers and crusading tiger men as he made his way through some of the planet's most breathtaking but diminishing wild places For there he hoped to achieve a dangerous great and perhaps foolhardy goal before dire circumstances and human greed rendered it unattainable to enter the last natural domain of the tiger unarmed and on foot and to confront the majestic beast face to face eye to eye *Of Tigers and Men* is an exceptional real life adventure story one of those rare and remarkable books that can honestly change the way we see our world **Bones of the Tiger** Hemanta

Mishra, **Going Places** Robert Burgin, 2013-01-08 Successfully navigate the rich world of travel narratives and identify fiction and nonfiction read alike with this detailed and expertly constructed guide Just as savvy travelers make use of guidebooks to help navigate the hundreds of countries around the globe smart librarians need a guidebook that makes sense of the world of travel narratives *Going Places A Reader's Guide to Travel Narratives* meets that demand helping librarians assist patrons in finding the nonfiction books that most interest them It will also serve to help users better understand the genre and their own reading interests The book examines the subgenres of the travel narrative genre in its seven chapters categorizing and describing approximately 600 titles according to genres and broad reading interests and identifying hundreds of other fiction and nonfiction titles as read alike and related reads by shared key topics The author has also identified award winning titles and spotlighted further resources on travel lit making this work an ideal guide for readers advisors as well a book general readers will enjoy browsing *In Search of the Rain Forest* Candace Slater, 2004-03-22

Collection of essays offers a multi layered understanding of the social complexities of rainforest practice and representation *Animals in Stone* Alexandra van der Geer, 2008-10-31 The art history of South Asia covers a time span of roughly four and a half thousand years During this period a vast number of animal stone sculptures has been produced ranging from the pre historic period till today and covering a great variety of motifs and imagery in different regions and religious traditions Even so the number of studies devoted to these animal sculptures has remained extremely limited The present book aims at filling this knowledge gap With this richly illustrated book the first of its kind Van der Geer offers a comparative study of the ways in which various animals have been depicted and a lucid analysis of the sculptors' treatment of their models living animals The art history of sculptured animals is contextualized with a description of the use of animals as can be read from ancient texts archaeological evidence and contemporaneous culture In doing so parallels as well as differences in style or iconography are highlighted elucidating the variety of animal depictions across regions religious contexts and through time

The corpus of discussed material ranges from Indus seals stupa panels and railings monumental temples from North and South India non religious palace and fort architecture to loose sculptures in museum collections Nature: Reconfiguring the social David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents *Tigers In Red Weather* Ruth Padel, 2009-05-26 Poet writer and descendant of Charles Darwin Ruth Padel set out to visit a tropical jungle and wildlife sanctuary in India and her visit turned into a remarkable two year journey through eleven countries in search of that most elusive and most beautiful animal the tiger Armed with her grandmother's opera glasses and Tunisian running shoes she set off across Asia to ask the question can the tiger be saved from extinction in the wild Tigers are an umbrella species they need everything in the forest to work in tandem they eat deer the deer need vegetation the vegetation has to be pollinated by birds mammals rodents and butterflies If you save the tiger you save everything else Today the 5 000 tigers that still survive in the wild live only in Asia and are scattered throughout 14 countries Padel says that while tigers will never become extinct they are too popular for that they may disappear from the wild There are as many tigers in cages in the US as there are surviving tigers in the wild As she travels she meets the defenders of the wild the heroic scientists forest guards and conservationists at the frontline fighting to save tigers and their forests from destruction in the places where poverty threatens to wipe out all wildlife She also examines her fascination both as a poet and as the great great granddaughter of Charles Darwin with nature wildness and survival and in the end becomes a knowledgeable advocate for the tiger The result is a beautiful blend of natural history travel literature and memoir and a searing intimate portrait of an animal we have loved and feared almost to extinction Three Ways to Disappear Katy Yocom, 2019-07-16 Leaving behind a nomadic and dangerous career as a journalist Sarah DeVaughan returns to India the country of her childhood and a place of unspeakable family tragedy to help preserve the endangered Bengal tigers Meanwhile at home in Kentucky her sister Quinn also deeply scarred by the past and herself a keeper of secrets tries to support her sister even as she fears that India will be Sarah's undoing As Sarah faces challenges in her new job made complicated by complex local politics and a forbidden love Quinn copes with their mother's refusal to talk about the past her son's life threatening illness and her own increasingly troubled marriage When Sarah asks Quinn to join her in India Quinn realizes that the only way to overcome the past is to return to it and it is in this place of stunning natural beauty and hidden

danger that the sisters can finally understand the ways in which their family has disappeared from their shared history from one another and recognize that they may need to risk everything to find themselves again With dramatic urgency a powerful sense of place and a beautifully rendered cast of characters revealing a deep understanding of human nature in all its flawed glory Katy Yocom has created an unforgettable novel about saving all that is precious from endangered species to the indelible bonds among family

*Beasts* Jeffrey Moussaieff Masson,2014-03-04 Bestselling author Jeffrey Masson shows us what the animals at the top of the food chain orca whales big cats etc can teach us about the origins of good and evil in ourselves In his previous bestsellers Masson has showed us that animals can teach us much about our own emotions love dogs contentment cats and grief elephants among others In *Beasts* he demonstrates that the violence we perceive in the wild is a matter of projection Animals predators kill to survive but animal aggression is not even remotely equivalent to the violence of mankind Humans are the most violent animals to our own kind in existence We lack what all other animals have a check on the aggression that would destroy the species rather than serve it In *Beasts* Masson brings to life the richness of the animal world and strips away our misconceptions of the creatures we fear offering a powerful and compelling look at our uniquely human propensity toward aggression

Strange and Wonderful Karen Polinger Foster,2020-05-04 Ever since the creation of the world s first botanical and zoological gardens five thousand years ago people have collected displayed and depicted plants and animals from lands beyond their everyday experience Some did so to demonstrate power over distant territories others to enhance prestige by possessing something no one had seen before *Exotica* also satisfied intellectual curiosity furthered scientific research and educated and entertained In addition *exotica* especially their state sponsored representation were often instruments of political persuasion and in turn exerted considerable influence over expansionist policies More than an account of gardens and menageries from antiquity to the present *Strange and Wonderful* explores the imagery of exotic flora and fauna in Western art seeking answers to certain fundamental and universal questions How do artists schooled in traditional modes of rendering the familiar deal with the new and strange Why are rare species deliberately introduced into images otherwise devoid of the unusual What is the pictorialized relationship between exotic reality and artistic imagination Karen Polinger Foster takes readers on a journey across millennia and around the globe telling fascinating stories and meeting along the way such characters as Hatshepsut s baboons Charlemagne s elephant D rer s rhinoceros and Victoria s hippopotamus What emerges is a sense of just how strong and far reaching the pull of the unknown and exotic has been across time and space Ultimately images of the wonderful reveal as much about the indigenous as they do about the strange enabling us to glimpse more vividly the power of imagination to mold the unknown to its purposes This dazzling and richly illustrated volume offers a thoughtful much needed inquiry into a very human phenomenon

*Sociology And Nature* Raymond Murphy,2018-03-05

Sociology as if nature did not matter has been the sociological expression of modern societies negligent of the processes of nature. In response to this ecological blindness, Raymond Murphy examines the limitations of sociology that have resulted from this neglect. Humanity's success in manipulating nature destabilizes the natural support system of society on a planetary scale and in turn destabilizes all of society's institutions. Because the manipulation of nature has become so central to modern society, society, Murphy argues, can now be understood only in terms of the interaction between social action and the processes of nature. The growing awareness that social constructions unleash dynamic processes of nature processes beyond human control that bear on social action has the potential of radically transforming sociology. Sociology and Nature proposes the reconstruction of sociology in which nature does matter, developing a novel sociological approach that situates social action in its natural context.

**Against The Conventional Wisdom** Douglas Dowd, 2019-04-10 For the past twenty five years the United States has undergone a retrogression in its socioeconomic policies facilitated and supported by most economists thanks to the steady drumbeat of arguments by entrepreneurs and politicians who celebrate the free market for anything and everything and who advocate among other follies balanced budgets and r How the Tiger Lost Its Stripes Cory J. Meacham, 1997 Working from firsthand interviews and investigations, journalist Meacham offers a balanced probing fascinating analysis of how tiger extinction is happening and what is being done to try and stop it. For those readers eager to understand the ecological and political forces at play behind the tiger's endangerment and for those who simply love tigers, this book offers an informed, compassionate view that can make a difference. *Last of the Wild* Robert M. McClung, 1997 Profiles threatened animals around the world and discusses why they are in danger and what is being done to save them.
