Northeast Asian Regionalism Korean Edition:

Korea at the Center: Dynamics of Regionalism in Northeast Asia Charles K. Armstrong, Gilbert Rozman, Samuel S. Kim, Stephen Kotkin, 2016-09-16 The common images of Korea view the peninsula as a long standing battleground for outside powers and the Cold War's last divided state But Korea's location at the very center of Northeast Asia gives it a pivotal role in the economic integration of the region and the dynamic development of its more powerful neighbors A great wave of economic expansion driven first by the Japanese miracle and then by the ascent of China has made South Korea an economic powerhouse in its own right the hub of the region once again a natural corridor for railroads and energy pipelines linking Asiatic Russia to China and Japan And over the horizon an opening of North Korea with multilateral support would add another major push toward regional integration Illuminating the role of the Korean peninsula in three modern historical periods the eminent international contributors to this volume offer a fresh and stimulating appraisal of Korea as the key to the coalescence of a broad open Northeast Asian regionalism in the twenty fifth century *Korea at the Center*, 2006

Political Economy of Northeast Asian Regionalism Jehoon Park, 2008-01-01 Functional integration in the economy has developed sufficiently in Northeast Asia This study proposes a Northeast Asian version of the regional integration model It suggests a crisis model and a political leadership model with political leadership playing a critical role in utilizing crises to advance regional integration *Northeast Asian Regionalism* Christopher M. Dent, David W. F. Huang, 2002 This examination of developments in North East Asian regionalism looks at security international relations international political economy and politics together with historical social and cultural factors *Routledge Handbook of Asian Regionalism* Mark Beeson, Richard Stubbs, 2012-03-15 The Routledge Handbook of Asian Regionalism is a definitive introduction to and analysis of the development of regionalism in Asia including coverage of East Asia Southeast Asia and South Asia The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world Significantly this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region economic issues political issues strategic issues regional organizations As such the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events This book will be an indispensable resource for students and scholars of Asian politics international relations and regionalism **East Asian Multilateralism** Kent E. Calder, Francis Fukuyama, 2008-04-15 While the Iraq war and Middle East conflicts command the attention of the United States and most of the rest of the developed world fundamental changes are occurring in East Asia North Korea has tested nuclear weapons even as it and South Korea have effectively entered a period of tepid détente relations among China Japan and South Korea are a complex mixture of conflict and cooperation and Japan is developing more forthright security policies even as it

deepens ties with the United States Together these developments pose vital questions for world stability and security In East Asian Multilateralism prominent international foreign affairs scholars examine the range of implications of shifting alignments in East Asia The first part delves into the intraregional dynamics and the second assesses current economic conditions and policies within individual East Asian states The third section examines the challenge of regional cooperation from the perspectives of local players while the fourth analyzes the implications for foreign policy in the United States and in Asia This thorough review and assessment charts the preconditions and prospects for deeper multilateralism poses tough questions about America s security and national interests in the region and carries a plea for more serious institution building in the North Pacific using the ongoing six party process in talks on North Korea as a point of departure

Asia-Pacific Issues ,2002 **North Korea and Economic Integration in East Asia** Yeongseop Rhee,Patrick Messerlin,2019-06-27 Throughout North Korea s history it has regarded external relations with suspicion and as a potential threat to its regime With North Korea working towards denuclearization there is now hope for an economic opening This book examines the external economic strategies that North Korea may consider for its reforms and development which are related to the East Asian economic integration process This book emphasizes that considering theoretical factors as well as conditions of the North Korean economy economic opening and integration should have high priority anteceding or at least being parallel to economic reforms and transformation Also among various alternative strategies for achieving the goal of economic reform and development based on economic opening the utilization of East Asian regional economic integration framework would be the best option for North Korea because this framework can provide an opportunity for North Korea to overcome structural problems in its external economic relations and to circumvent political conflicts thus leading to a smoother rapprochement towards economic opening This book is timely as it shows how a new economic recovery strategy on the Korean Peninsula may be accomplished Between Compliance and Conflict Jorge Dominguez,Byung Kook Kim,2013-01-11 This book examines the responses to U S power in the two areas of the world where U S primacy was first successfully consolidated East Asia and Latin America The U S has faced no comparably powerful challengers to the exercise of its power in Latin America for much of the past century It established its primacy over much of East Asia in the aftermath of WW II and extended its influence in the late 1970 s and after the end of the Vietnam War through its entente with China to balance the Soviet Union By contrast the U S has always encountered rivals and challengers in Europe has attempted unsuccessfully thus far to impose its primacy in the Middle East and has paid only intermittent attention to South Asia and Africa The essays in this volume will explore three important themes 1 How do region wide economic trends and arrangements sustain or modify U S influence in the region 2 How do rising powers in these regions Japan China Brazil reshape their policies to cope with the U S and 3 How do new South Korea and old Cuba challengers to U S power shape their policies to account for the unrivaled exercise of U S power This collection will place the United States at the hub of

relations with countries in East Asia and Latin America and examine the new policies and new styles of engagement that are employed to address the prolonged U S interest in these areas approaches from which the rest of the world might learn

Politics in North and South Korea Yangmo Ku, Inyeop Lee, Jongseok Woo, 2017-12-06 Politics in North and South Korea provides students with a comprehensive understanding of the political dynamics of the two Koreas Giving equal weight to North and South Korea the authors trace the history of political and economic development and international relations of the Korean peninsula showing how South Korea became democratized and how Juche ideology has affected the establishment and operation of a totalitarian system in North Korea Written in a straightforward jargon free manner this textbook utilizes both historical institutional approaches and quantitative evidence to analyse the political dimensions of a wide variety of issues including Legacies of early twentieth century Japanese colonial rule South Korean democratization and democratic consolidation South Korean diplomacy and North Korean nuclear crises The economic development of both North and South Korea The three generation power succession in North Korea North Korean human rights issues Inter Korean relations and reunification This textbook will be essential reading for students of Korean Politics and is also suitable for undergraduate and postgraduate courses on East Asian Politics Asian Studies and International Relations *Ethnic Nationalism in Korea*

Gi-Wook Shin, 2006 This book explains the roots politics and legacy of Korean ethnic nationalism which is based on the sense of a shared bloodline and ancestry Belief in a racially distinct and ethnically homogeneous nation is widely shared on both sides of the Korean peninsula although some scholars believe it is a myth with little historical basis Finding both positions problematic and treating identity formation as a social and historical construct that has crucial behavioral consequences this book examines how such a blood based notion has become a dominant source of Korean identity overriding other forms of identity in the modern era It also looks at how the politics of national identity have played out in various contexts in Korea semicolonialism civil war authoritarian politics democratization territorial division and globalization Asia's New Multilateralism Michael J. Green, Bates Gill, 2009-03-19 Traditionally stability in Asia has relied on America s bilateral alliances with Japan Australia and the Republic of Korea Yet in recent years emergent and more active multilateral forums such as the Six Party Talks on North Korea and the East Asia Summit have taken precedence engendering both cooperation and competition while reflecting the local concerns of the region Some are concerned that this process is moving toward less inclusive bloc based talking shops and that the future direction and success of these arrangements along with their implications for global and regional security and prosperity remain unclear The fifteen contributors to this volume all leading scholars in the field provide national perspectives on regional institutional architecture and their functional challenges They illuminate areas of cooperation that will move the region toward substantive collaboration convergence of norms and strengthened domestic institutions They also highlight the degree to which institution building in Asiaa region composed of liberal democracies authoritarian regimes and anachronistic dictatorship has become an arena for competition

among major powers and conflicting norms and assess the future shape of Asian security architecture reviewing a previous edition or volume

Evolution of the United Nations System The Japan Association for United Nations Studies (JAUNS),2023-07-31 Contributors from Japan Korea and China explore the reaction of the United Nations to emerging global issues A collaboration between the Japan Association for United Nations Studies with the Korea Academic Council on the United Nations System and the China Academic Net for United Nations Studies this book presents a range of perspectives from both academics and practitioners The areas explored and discussed include global governance peace and security global health governance global citizenship nuclear disarmament and the Sustainable Development Goals In particular and among other issues it addresses both the coordination of COVID 19 management and responses to Russia s invasion of Ukraine An invaluable diverse and concerted non Western approach to the challenges facing the UN

Contested Multilateralism 2.0 and Asian Security Dynamics Kai He,2020-04-28 In the 1990s there was a wave of multilateralism in the Asia Pacific led primarily by ASEAN Since the Global Financial Crisis of 2008 however many non ASEAN states have attempted to seize the initiative including the USA Japan China South Korea and Australia Kai He and his contributors debate the reasons for this contested multilateralism and the impacts it will have on the region s security and political challenges Will the Indo Pacific turn be a blessing or a curse for regional stability and prosperity Using a diverse range of theoretical and empirical perspectives these leading scholars contribute views on this question and on the diverse strategies of the great and middle powers in the region This collection will be of great interest to scholars and students of international relations in the Asia Pacific and of great value to policy makers in the region and beyond

The US Versus the North Korean Nuclear Threat Er-Win Tan,2013-11-26 Although the current world order is still dominated by the US there is increasing international concern over the possibility of regional security dilemmas arising from smaller powers attempts to develop Weapons of Mass Destruction A study of US North Korean interaction using the security dilemma as a conceptual frame of analysis is thus not only hugely topical but also particularly relevant for the 21st century on theoretical as well as empirical grounds Is there the prospect of a security dilemma contagion if North Korea acquire nuclear weapons capability leading to an Asia Pacific wide nuclear arms race This book examines this contentious issue in depth and explores the difficult choices policymakers face as a result of the uncertainty in international politics

The Making of Northeast Asia Kent Calder,Min Ye,2010-08-16 This book offers a detailed analysis of the domestic politics of regionalism in the three major nations of Northeast Asia China Japan and Korea as well as in the most important external actor the United States

Middle Powers and Regional Influence Joshua B. Spero,2018-11-16 In the growing literature on middle powers this book contributes by expanding case study analysis and extending international relations theory in its application to foreign policy decisions Thus this book builds on prominent middle power literature and aims to advance our theoretical understanding for why crucial foreign policies were made by the pivotal middle powers this book examines Poland South Korea and Bolivia For this

book's three case studies and their first term leadership's critical junctures from first term post communist Poland post authoritarian post ruling party South Korea and post colonial Bolivia we have the antecedents for contemporary middle powers essential for realizing the regional evolution for cooperative change with greater powers systemically we may then grasp today why those historical foreign policies albeit not so long ago give us crucial antecedents for adapting and trying yet again to resolve seemingly perennial power dilemmas regionally peacefully Here are why middle power impact matters not only regionally for stronger dominant greater power neighbours but also for transformative middle power leaderships which proved pivotal geopolitically for their region's challenges and changes China-Japan-South Korea Trilateral Cooperation

Muhui Zhang, 2025-01-01 This open access book aims to review the history achievements and challenges of trilateral cooperation among China Japan and South Korea in a systematic way It offers numerous perspectives to explain the emergence of trilateral institution building processes and the fluctuations of trilateral cooperation and underscores three countries respective policy stances towards the building of the triangle The evolvement of political and economic ties among China Japan and South Korea has vital importance to the peace and prosperity of East Asia Recent years have witnessed the ups and downs of the trilateral cooperation among the three countries The development of trilateral institution building emerged as a joint gesture in response to the Asian Financial Crisis in the late 1990s The three countries jointly established multilayered cooperative mechanisms in a wide range of fields Nonetheless trilateral cooperation among the three major powers has been proceeding in hardship in the shadow of longstanding geopolitical complexity and the deepening Sino US confrontations This book argues that despite growing economic and social linkages political animosities have constantly impeded the trilateral cooperation Relevant to scholars and advanced students in international relations and political economy this is a vital read in East Asian studies **Popular Culture Co-Productions and Collaborations in East and Southeast Asia**

Eyal Ben-Ari, Nissim Otmazgin, 2012-10-01 This wide ranging volume is the first to examine the characteristics dynamics and wider implications of recently emerging regional production dissemination marketing and consumption systems of popular culture in East and Southeast Asia Using tools based in a variety of disciplines organizational analysis and sociology cultural and media studies and political science and history it elucidates the underlying cultural economics and the processes of region wide appropriation of cultural formulas and styles Through discussions of Japanese Chinese Korean Philippine and Indonesian culture industries the authors in the book describe a major shift in Asia's popular culture markets toward arrangements that transcend autonomous national economies by organizing and locating production distribution and consumption of cultural goods on a regional scale Specifically the authors deal with patterns of co production and collaboration in the making and marketing of cultural commodities such as movies music comics and animation The book uses case studies to explore the production and exploitation of cultural imaginaries within the context of intensive regional circulation of cultural commodities and images Drawing on empirically based accounts of co production

and collaboration in East and Southeast Asia's popular culture it adopts a regional framework to analyze the complex interrelationships among cultural industries This focus on a regional economy of transcultural production provides an important corrective to the limitations of previous studies that consider cultural products as text and use them to investigate the meaning of popular culture

Trade Policy in the Asia-Pacific Vinod K. Aggarwal, Seungjoo Lee, 2010-11-03 East Asian countries are now pursuing greater formal economic institutionalization weaving a web of bilateral and minilateral preferential trade agreements Scholarly analysis of formal East Asian regionalism focuses on international political and economic factors such as the end of the Cold War the Asian financial crisis or the rising Sino Japanese rivalry Yet this work pays inadequate attention to the strategies of individual government agencies business groups labor unions and NGOs across the region Moreover most studies also fail to adequately characterize different types of trade arrangements often lumping together bilateral accords with minilateral ones and transregional agreements with those within the region To fully understand this cross national variance this book argues that researchers must give greater attention to the domestic politics within East Asian countries and the U S involving the interplay of these subnational players With contributions from leading country and regional trade specialists this book examines East Asian and American trade strategies through the lens of a domestic bargaining game approach with a focus on the interplay of interests ideas and domestic institutions within the context of broader international shifts With respect to domestic politics the chapters show how subnational actors engage in lobbying both of their own governments and through their links to others in the region They also trace the evolution of interests and ideas over time helping us to generate a better understanding of historical trends in the region In addition to scholars of East Asian and comparative regionalism this book will be of interest to policy makers concerned with international trade and U S Asia relations and those interested in understanding the rich trade institutional landscape that we see emerging in the Asia Pacific
