Oil And Honey The Education Of An Unlikely Activist:

Oil and Honey Bill McKibben, 2015-01-29 Bestselling author and environmental activist Bill McKibben recounts the personal and global story of the fight to build and preserve a sustainable planet Bill McKibben is not a person you deexpect to find hand cuffed in the city jail in Washington D C But that s where he spent three days in the summer of 2011 after leading the largest civil disobedience in thirty years to protest the Keystone XL pipeline A few months later the protesters would see their efforts rewarded when President Obama agreed to put the project on hold And yet McKibben realized that this small and temporary victory was at best a stepping stone With the Arctic melting the Midwest in drought and Hurricane Sandy scouring the Atlantic the need for much deeper solutions was obvious Some of those would come at the local level and McKibben recounts a year he spends in the company of a beekeeper raising his hives as part of the growing trend toward local food Other solutions would come from a much larger fight against the fossil fuel industry as a whole Oil and Honey is McKibben's account of these two necessary and mutually reinforcing sides of the global climate fight from the absolute centre of the maelstrom and from the growing hive of small scale local answers to the climate crisis With characteristic empathy and passion he reveals the imperative to work on both levels telling the story of raising one year's honey crop and building a social movement that s still cresting Confronting Totalitarian Minds: Jan Patočka on Politics and Dissidence Aspen E. Brinton, 2021-05-01 The Czech philosopher Jan Patocka not only witnessed some of the most turbulent politics of twentieth century Central Europe but shaped his philosophy in response to that tumult One of the last students of Edmund Husserl and Martin Heidegger he inspired V clay Havel and other dissidents who confronted the Communist regime before 1989 as well as being actively involved in authoring and enacting Charter 77 He died in 1977 from medical complications resulting from interrogations of the secret police Confronting Totalitarian Minds examines his legacy along with several contemporary applications of his ideas about dissidence solidarity and the human being s existential confrontation with unjust politics Expanding the current possibilities of comparative political theory the author puts Patocka's ideas about dissidence citizen mobilization and civic responsibility into conversation with notable world historical figures like Mahatma Gandhi Vaclav Havel Dietrich Bonhoeffer and other contemporary activists In adding a fresh voice to contemporary conversations on transcending injustice Confronting Totalitarian Minds seeks to educate a wider audience about this philosopher's continued relevance to political dissidents across the world **Cryopolitics** Joanna Radin, Emma Kowal, 2017-03-24 The social political and cultural consequences of attempts to cheat death by freezing life As the planet warms and the polar ice caps melt naturally occurring cold is a resource of growing scarcity At the same time energy intensive cooling technologies are widely used as a means of preservation Technologies of cryopreservation support global food chains seed and blood banks reproductive medicine and even the preservation of cores of glacial ice used to study climate change In many cases these practices of freezing life are an attempt to cheat death Cryopreservation has contributed

to the transformation of markets regimes of governance and ethics and the very relationship between life and death In Cryopolitics experts from anthropology history of science environmental humanities and indigenous studies make clear the political and cultural consequences of extending life and deferring death by technoscientific means The contributors examine how and why low temperatures have been harnessed to defer individual death through freezing whole human bodies to defer nonhuman species death by freezing tissue from endangered animals to defer racial death by preserving biospecimens from indigenous people and to defer large scale human death through pandemic preparedness. The cryopolitical lens emphasizing the roles of temperature and time provokes new and important questions about living and dying in the twenty first century Contributors Warwick Anderson Michael Bravo Jonny Bunning Matthew Chrulew Soraya de Chadarevian Alexander Friedrich Klaus Hoeyer Fr d ric Keck Eben Kirksey Emma Kowal Joanna Radin Deborah Bird Rose Kim TallBear Charis Thompson Governing Complex Systems Oran R. Young, 2017-02-24 An David Turnbull Thom van Dooren Rebecca J H Woods exploration of the need for innovative mechanisms of governance in an era when human actions are major drivers of environmental change The onset of the Anthropocene an era in which human actions have become major drivers of change on a planetary scale has increased the complexity of socioecological systems Complex systems pose novel challenges for governance because of their high levels of connectivity nonlinear dynamics directional patterns of change and emergent properties Meeting these challenges will require the development of new intellectual capital In this book Oran Young argues that to achieve sustainable outcomes in a world of complex systems we will need governance systems that are simultaneously durable enough to be effective in guiding behavior and agile enough to adapt to rapidly changing circumstances While some insights from past research on governance remain valid in this setting Young argues that we need new social capital to supplement mainstream regulatory approaches that feature rule making with an emphasis on compliance and enforcement He explores the uses of goal setting as a governance strategy the idea of principled governance and the role of what is often called good governance in meeting the challenges of the Anthropocene Drawing on his long experience operating on the science policy frontier Young calls for more effective collaboration between analysts and practitioners in creating and implementing governance systems capable of producing sustainable outcomes in a world of complex systems **Thinkers on the Environment** Joy A. Palmer Cooper, David E. Cooper, 2017-09-14 Key Thinkers on the Environment is a unique guide to environmental thinking through the ages Joy A Palmer Cooper and David E Cooper themselves distinguished authors on environmental matters have assembled a team of expert contributors to summarize and analyse the thinking of diverse and stimulating figures from around the world and from ancient times to the present day Among those included are philosophers such as Rousseau Kant Spinoza and Heidegger activists such as Chico Mendes and Wangari Maathai literary giants such as Virgil Goethe and Wordsworth major religious and spiritual figures such as Buddha and St Francis of Assissi eminent scientists such as Darwin Lovelock and E O Wilson Lucid scholarly and informative the essays contained within this

volume offer a fascinating overview of humankind s view and understanding of the natural world **Biological Economies** Richard Le Heron, Hugh Campbell, Nick Lewis, Michael Carolan, 2016-01-22 Recent agri food studies including commodity systems the political economy of agriculture regional development and wider examinations of the rural dimension in economic geography and rural sociology have been confronted by three challenges These can be summarized as more than human approaches to economic life a post structural political economy of food and agriculture and calls for more enactive performative research approaches This volume describes the genealogy of such approaches drawing on the reflective insights of more than five years of international engagement and research It demonstrates the kinds of new work being generated under these approaches and provides a means for exploring how they should be all understood as part of the same broader need to review theory and methods in the study of food agriculture rural development and economic geography This radical collective approach is elaborated as the Biological Economies approach The authors break out from traditional categories of analysis reconceptualising materialities and reframing economic assemblages as biological economies based on the notion of all research being enactive or performative The Hands-On Life Amy E. Weldon, 2018-01-30 Stressed out Swimming in a sea of screens Worried about our beloved endangered earth yet uncertain how to work for change If this sounds familiar you re not alone In this intelligent guide to mindfulness in the digital age writer and teacher Amy Weldon describes how practicing life as an artist can help you wake yourself up and take back control of your attention your money your time and the health of our society and our planet Traveling from farm to protest march to classroom and engaging a range of thinkers from Hannah Arendt to George Orwell John Keats and Henry David Thoreau The Hands On Life is a book for students and for everyone who dreams of building a better world Strategic Design Thinking Natalie W. Nixon, 2015-10-22 Who can design For too long that question has highlighted the supposed division between right brain dominant creative types and left brain dominant analytical types Such a division is not practical for preparing students to become innovative contributors to the complex world of design Strategic Design Thinking guides readers to cultivate hybrid thinking whether their background is design finance or any discipline in between This book is an introduction to an integrative approach using the lens of design thinking as a way to see the world The focus is on process instead of solution and on connecting disparate ideas instead of getting bogged down by silos of specialization Through this book students will be introduced to design management strategic design service design and experience design **Grassroots Environmental** Governance Leah Horowitz, Michael Watts, 2016-12-08 Grassroots movements can pose serious challenges to both governments and corporations However grassroots actors possess a variety of motivations and their visions of development may evolve in complex ways Meanwhile their relative powerlessness obliges them to forge an array of shifting alliances and to devise a range of adaptive strategies Grassroots Environmental Governance presents a compilation of in depth ethnographic case studies based on original research Each of the chapters focuses specifically on grassroots engagements

with the agents of various forms of industrial development. The book is geographically diverse including analyses of groups based in both the global North and South and represents a range of disciplinary perspectives. This allows the collection to explore themes that cross cut specific localities and disciplinary boundaries and thus to generate important theoretical insights into the complexities of grassroots engagements with industry This volume will be of great interest to scholars of environmental activism environmental governance and environmental studies in general A Centennial History of the **Ecological Society of America** Frank N.
