**Voices from Early China** Geoffrey Sampson, 2020-06-18 The Chinese Book of Odes Shijing is a collection of 305 poems dating from between 1000 and 600 B C and thus is one of the earliest literary works in any living language It offers vignettes of life in an almost unimaginably remote society many of the poems have great charm for instance some are authored by women about their love problems For such early literature it is remarkable how many poems are by women Over the centuries the content of the Odes has become obscured by developments in the Chinese language by prudishness and pomposity on the part of commentators and because earlier translators were often more interested in philological technicalities than in the poems human significance This book cuts through these obscurities to present a new translation into straightforward down to earth English The Odes are the earliest

rhyming poetry in any language and they make use of alliteration and assonance to achieve their poetic effects but changes in the sounds of modern Chinese have destroyed all this speech music This book restores it alongside the author's translations it spells the Chinese wording out in the sounds used by the original poets something which has only recently become possible through advances in the reconstruction of Old Chinese speech      Literary Forms of Argument in Early China ,2015-08-17 Literary Forms of Argument in Early China explores formal approaches to the study of philosophical texts to present new methods for the analysis of pre modern thought in China Attempts made by Chinese thinkers to generate literary forms of philosophical reasoning have gone unrecognised within scholarship in China and the West Drawing together the expertise of leading scholars of early Chinese textuality this volume addresses this omission by examining the formal characteristics of an argument the interrelationship between form and content as well as patterned compositions and non linear semantic utterances With these comprehensive new readings the volume makes a landmark contribution to the study of written thinking in early China Contributors include Wim De Reu Joachim Gentz Christoph Harbsmeier Martin Kern Dirk Meyer Michael Nylan Andrew H Plaks David Schaberg Rudolf G Wagner      An Introduction to Chinese Poetry Michael Fuller,2020-10-26 This innovative textbook for learning classical Chinese poetry moves beyond the traditional anthology of poems translated into English and instead brings readers including those with no knowledge of Chinese as close as possible to the texture of the poems in their original language The first two chapters introduce the features of classical Chinese that are important for poetry and then survey the formal and rhetorical conventions of classical poetry The core chapters present the major poets and poems of the Chinese poetic tradition from earliest times to the lyrics of the Song Dynasty 960 1279 Each chapter begins with an overview of the historical context for the poetry of a particular period and provides a brief biography for each poet Each of the poems appears in the original Chinese with a word by word translation followed by Michael A Fuller's unadorned translation and a more polished version by modern translators A question based study guide highlights the important issues in reading and understanding each particular text Designed for classroom use and for self study the textbook's goal is to help the reader appreciate both the distinctive voices of the major writers in the Chinese poetic tradition and the grand contours of the development of that tradition      A Grammar of Shaowu Sing Sing Ngai,2021-09-20 This is the first comprehensive grammar of Shaowu a Min language spoken in Shaowu city and its environs in northwestern Fujian province China The book offers first hand linguistic data collected over four years in the field now placed at the disposal of researchers and students working in language documentation comparative linguistics and Sinitic typology It can serve as a reference grammar for those interested in learning the Shaowu language thereby helping to preserve it In addition the book provides insights into Shaowu's classification which has been widely debated thus elucidating its genetic affiliation The book first presents Shaowu's geography demography and history It then profiles the language's phonology and lexicon before providing a detailed description of its syntax notably on its nominal predicate

clausal and complex sentence structures which are the focus of the book The typological profile of Shaowu is also treated with the conclusion that the language has Gan Hakka Mandarin and even some Wu overlays on its Min base The Shaowu language serves an excellent example to illustrate the degree of hybridity a language can attain due to intensive language contact over time Rome, China, and the Barbarians Randolph B.
