Old Goriot Analysis:

A Study Guide for Honore De Balzac's "Pere Goriot" Cengage Learning Gale, 2017-07-25 A Study Guide for Honore de Balzac's *Pere Goriot* excerpted from Gale's acclaimed *Novels for Students*. This concise study guide includes plot summary, character analysis, author biography, study questions, historical context, suggestions for further reading, and much more. For any literature project, trust *Novels for Students* for all of your research needs.

The Long Life Helen Small, 2010-09-16 *The Long Life* invites the reader to range widely from the writings of Plato through to recent philosophical work by Derek Parfit, Bernard Williams, and others, and from Shakespeare's *King Lear* through works by Thomas Mann, Balzac, Dickens, Beckett, Stevie Smith, Philip Larkin, to more recent writing by Saul Bellow, Philip Roth, and J. M. Coetzee. Helen Small argues that if we want to understand old age, we have to think more fundamentally about what it means to be a person, to have a life, to have or lead a good life, to be part of a just society. What did Plato mean when he suggested that old age was the best place from which to practice philosophy, or Thomas Mann when he defined old age as the best time to be a writer, and were they right? If we think as Aristotle did that a good life requires the active pursuit of virtue, how will our view of later life be affected? If we think that lives and persons are unified, much as stories are said to be unified, how will our thinking about old age differ from that of someone who thinks that lives and/or persons can be strongly discontinuous? In a just society, what constitutes a fair distribution of limited resources between the young and the old? How, if at all, should recent developments in the theory of evolutionary senescence alter our thinking about what it means to grow old? This is a groundbreaking book, deep as well as broad, and likely to alter the way in which we talk about one of the great social concerns of our time: the growing numbers of those living to be old, and the growing proportion of the old to the young.

Balzac, James, and the Realistic Novel

William W. Stowe, 2014-07-14 This book has a double purpose: to compare the literary projects, theories, and careers of Balzac and Henry James, and to develop a theory of realism that can account for their unabashed mimetic intentions and for their novels' sophisticated textuality. Originally published in 1983, *The Princeton Legacy Library* uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Affective Disorders Bede Scott, 2019 *Affective Disorders* explores the significance of emotion in a range of colonial and postcolonial narratives. Through close readings of Naguib Mahfouz, Joaquim Maria Machado de Assis, and Upamanyu Chatterjee, among others, Bede Scott argues that literary representations of emotion need not be interpreted solely at the level of character, individual psychology, or the contingencies of plotting, but could also be related to broader sociopolitical forces.

The One vs. the Many Alex Woloch, 2009-02-09 Does a novel focus on one life or many? Alex Woloch uses this simple question to develop a powerful new

theory of the realist novel based on how narratives distribute limited attention among a crowded field of characters His argument has important implications for both literary studies and narrative theory Characterization has long been a troubled and neglected problem within literary theory Through close readings of such novels as *Pride and Prejudice* *Great Expectations* and *Le P re Goriot* Woloch demonstrates that the representation of any character takes place within a shifting field of narrative attention and obscurity Each individual whether the central figure or a radically subordinated one emerges as a character only through his or her distinct and contingent space within the narrative as a whole The character space as Woloch defines it marks the dramatic interaction between an implied person and his or her delimited position within a narrative structure The organization of and clashes between many character spaces within a single narrative totality is essential to the novel s very achievement and concerns striking at issues central to narrative poetics the aesthetics of realism and the dynamics of literary representation Woloch s discussion of character space allows for a different history of the novel and a new definition of characterization itself By making the implied person indispensable to our understanding of literary form this book offers a forward looking avenue for contemporary narrative theory

Propertius: A Hellenistic Poet on Love and Death Theodore D. Papanghelis, 1987-05-28 The bond between love and death has long been recognised as a defining characteristic of the elegies of Propertius but scholars have rarely clarified how or to what degree Propertius differed from other love poets in associating these themes In this book Dr Papanghelis traces the radical way in which Propertius dealt with amorous and morbid fantasies in his poems He argues that the modes of erotic expression used in the elegies are fundamentally unconventional to the point that the definitions of love and death are interdependent This book offers a detailed reading of some of the most stimulating and problematic of Propertius elegies offering fresh insight on the question of the poet s sensuous temperament and the significance of the love death relationship in his works

The Life-Death Instinct Neil Maizels, 2023-12-14 Throughout this enlightening collection Neil Maizels considers the helical tandem between the Life Instinct and the Death drive in the light of canonical literary figures like Thomas Hardy Patricia Highsmith Sylvia Plath and Shakespeare classic filmmakers like Hitchcock and contemporary television shows such as *Curb Your Enthusiasm* *The West Wing* and *Succession* This light is filtered through intricate clinical work whereby Maizels seeks to illustrate and expound on the strength and indefatigability of the Life Instinct He makes a case for it as the relentless driver of integration and binding in the ever growing expansive psyche He considers both Freud s original equation of the Life Instinct with Eros and a widening interconnecting love of mankind and Melanie Klein s with gratitude and creative reparation This book is a multi layered presentation of the clinical and theoretical work of Neil Maizels as it has evolved and convolved over several decades It places the feeling through of one s conflicts at
