New Rules of Sociological Method Anthony Giddens,1984 *Sociological Theory and Collective Subjectivity* J. Domingues,1995-11-01 The main theme of this book is collective subjectivity analysed especially in connection with the work of Marx Parsons Giddens and Habermas but also addressing the manifold tendencies of sociological theory from its inception to the present The book supports the idea that there is a conceptual shortcoming in the most relevant contemporary research programs in sociological theory despite some recent efforts to re develop concepts of collective actor class or social movement After the fragmentation of the sixties a number of synthetical approaches emerged Some writers such as Touraine Laclau and Mouffe Olson Coleman Hindess Mouzelis and Eder have proposed some versions of concepts of collective subjectivity focusing on collective actors classes genders social movements organisations and collective utilitarian action But they do not in terms of general conceptual construction go further than Parsons and Marx they often fail to match their original formulations The concept of collective subjectivity is introduced to bring together these diverse approaches which are synthesised and receive a more general definition Moreover this new concept is directly linked to those contemporary syntheses

ended accounts of ancient cultures the authors also address the contemporary political and ethical implications of what is essentially a debate about the definition of human nature

Vilfredo Pareto, 1985 Belligerent Broadcasting Michael Higgins, Angela Smith, 2016-09-13 Why is rudeness such a prominent feature of contemporary broadcasting? If broadcasting is about the enactment of sociability, then how can we account for the fact that broadcasting has become a sphere of anger, humiliation, anger, dispute and upset? And to what extent does belligerence in broadcasting reflect broader social and cultural developments? This book reflects upon and analyses the development of belligerent broadcasting, beginning with an examination of belligerence in its historical context and as an aspect of wider cultural concerns surrounding the retreat of civility. With attention to the various relations of power expressed in the various forms of belligerent conduct across a range of media genres, the authors explore its manifestation in political interviews in the form of confrontation in talk shows in makeover television as an authentic means of proffering opinion and as a form of sociability or banter. Richly illustrated with studies and examples of well-known shows from both sides of the Atlantic including *The Apprentice*, *The Fixer*, *American Idol*, Gordon Ramsay's *Kitchen Nightmares*, *DIY SOS*, *The Jeremy Kyle Show* and *Dragon's Den*, this book reflects on the consequences and potentialities of belligerence in the media and public sphere. It will appeal to scholars and students of cultural and media studies, communication and popular culture.

Strategy-technology Alignment Paul Griffiths, 2011 It has been known for quite some time that ICT can directly improve corporate performance if it is employed in an appropriate way. There are many stories of how organisations have been transformed by the use of this technology. However, it is also known that it is not a simple task to employ ICT effectively. Many organisations have spent considerable sums of money and had only very modest returns. This book addresses the issues of how to deliver significant improvements in corporate performance through the use of ICT and it offers different models which can be of assistance to organisational leaders in this respect. These models are brought to life by analysing a series of real-life case studies encompassing both successes and failures in the adoption of ICT from which deep insights on how to apply this technology for competitive advantage are extracted. The book is suitable for both ICT professionals and for members of senior management including CEOs. It has been written in an accessible way so that it will also be of value to academics who offer courses in ICT strategy and implementation. It will expose their students to the dilemmas of management decisions concerning the different uses of ICT and its role in value creation. 260 Pages *Key Concepts in Organization Theory* Ann L. Li, 2019-01-15 Published in 1998 in this book the author points out the inadequacies caused by the division between housing research on production and consumption and the theoretical divide between structural and agent centred approaches on housing By developing an understanding of social relations within the structured process of housing provision the author argues that action and the specific form of housing provision can be better understood By using pre sale housing in Taiwan as a positive

example the author shows how housing production and consumption are closely related and structured through agents purposive interaction and how agents are benefited through their relations
