Mapping Reality Willie Maartens, 2006-06 We must clearly distinguish between reality, the territory and what we perceive to be reality, the map of the territory. In our journey through life, we need something to guide us, to give us reassurance that we are on the right track. Modern science has done its best to take that reassurance away from us, telling us that there is no destination, no purpose in life, and that in effect, our lives are an accident of Nature. Religion too has become equally unhelpful; it has become dogmatic, sectarian and self-serving. We have lost the core, the real message of religion, but we still need true spirituality. Indeed, we need a map to the Truth. *Electronic and Electrical Engineering* Lionel Warnes, 2017-03-14 A third edition of this popular text which provides a foundation in electronic and electrical engineering for HND and undergraduate students. The book offers exceptional breadth of coverage without sacrificing depth. It uses a

wealth of practical examples to illustrate the theory and makes no excessive demands on the reader's mathematical skills. Ideal as a teaching tool or for self study.
