**Capitalism's Safety Net: News Media and the Far Right** Peter Milonas,2024-12-29 The influence of news coverage on the rise of far right ideologies is undeniable To better understand the potential impact of the liberal media on the development of authoritarian ultra nationalist xenophobic racist or reactionary views it is essential to explore the connection between dominant ideology and the role of news organizations in society Using my analytical framework I demonstrate how the mass media leverages the safety net to bolster far right candidates and parties and weaken radical left wing political groups and social movements particularly during capitalist crises My project goes beyond scrutinizing commercial media and critically analyzes the capitalist mode of production

*Political Entertainment in a Post-Authoritarian Democracy* Martin Echeverría, Frida V. Rodelo, 2023-08-25 The book offers an analytical and empirical account of the specificities of political entertainment in post authoritarian democracies Centered around Mexico as a case study the book explores the production of political entertainment in post authoritarian legacy media and how political and economic conditions constrain the range and edge of discourse how political entertainment in social media is shaped by the structure of platforms as creators are encouraged to conform to specific norms such as constant publication and the impacts of these media on attitude formation among the population The book proposes a theoretical framework for identifying the specific conditions of post authoritarian democracies that constrain the production of political entertainment as well as its outcomes in terms of content and effects This framework can be applied to the analysis of similar case studies particularly in the Global South at large With an analysis drawing on hard data historical accounts and anecdotal evidence this volume will resonate within academic communities interested in political communication media studies

**Islam in British media discourses** Laurens de Rooij, 2020-05-09 Media reporting on Islam and Muslims commonly relate stories about terrorism violence or the lack of integration with western values and society Yet there is little research into how non Muslims engage with and are affected by these news reports Inspired by the overtly negative coverage of Islam and Muslims by the mainstream press and the increase in Islamophobia across Europe this book explores the influence of these depictions on the thoughts and actions of non Muslims Building on extensive fieldwork interviews and focus groups Laurens de Rooij argues that individuals negotiate media reports to fit their existing outlook on Islam and Muslims Non Muslim responses to these reports de Rooij argues are not only reproductions of local and personal contextuality but are co dependent and co productive to the reports themselves Pseudology Marcel Danesi, 2024-09-11 In an age where fake news conspiracy theories and outright lies by political and cultural leaders are commonplace we may be becoming accustomed to lying or worse even immune to it Pseudology unravels the reasons for this by describing a science of lying that looks at various aspects of this trait from how it affects the brain to how it distorts perception Interest in lying goes back to antiquity and writing and debate has only increased in the present day but what is missing is a treatment that synthesizes the work from linguists political scientists anthropologists psychologists neuroscientists and sociologists tying them to the philosophical and literary views of lying throughout history Such a treatment can be called pseudology an interdisciplinary science for classifying collating and assessing ideas about lying This book is a comprehensive treatment of pseudology emphasising the importance of studying lying in our current climate

Pseudology addresses questions such as What is a lie Why do we lie Why are we so susceptible to lying How does lying activate false beliefs and generate hatred of others How has lying shaped the course of history at least to some extent How has lying been adopted as a basic thematic element in literature and the arts Synthesising research from a broad range of disciplines and from the perspective of a leading cognitive linguist this text weaves ideas and theories about lying cohesively into an overall interdisciplinary science This landmark book is vital for students and scholars of language as well as anyone interested in politics sociology or psychology

**The Rise and Fall of Television Journalism** Steven Barnett, 2011-11-08 This book traces the history of television journalism in Britain from its austere roots in the BBC's post war monopoly to the present day plethora of 24 hour channels and celebrity presenters It asks why a medium whose thirst for pictures personalities and drama makes it some believe intrinsically unsuitable for serious journalism should remain in the internet age the most influential purveyor of news Barnett compares the two very different trajectories of television journalism in Britain and the US arguing that from the outset a rigorous statutory and regulatory framework rooted in a belief about the democratic value of the medium created and sustained a culture of serious responsible accurate and interrogative journalism in British television The book's overarching thesis is that despite a very different set of historical regulatory and institutional practices there is a very real danger that Britain is now heading down the same road as America

*Muslims, Minorities, and the Media* Laurens de Rooij, 2023-03-01 Inspired by overtly negative coverage by the Western mainstream press of Muslims in particular and minorities in general this book asks Why are negative narratives and depictions of Muslims and other minorities so hard to change News reports about Islam and Muslims commonly relate stories that discuss terrorism violence or other unwelcome or irrational behaviour or the lack of integration and compatibility of Muslims and Islam with Western values and society Yet there is little research done on how studies on media reports about minorities seemingly fail to improve the situation Combining empirical research with a structural analysis of the media industry this volume presents evidence for the maligned representation of minorities by media corporations analysing why negative narratives persist and outlining how these can be effectively transformed It is an outstanding resource for students and scholars of media religion culture sociology and Islamic studies and is also of benefit for journalists media representatives and activists looking to effect change for minority representation in the media industry specifically or in society at large
