animal and the widespread understanding of language as a product of the voice It is here that Reading Victorian Deafness offers substantial contributions to the fields of Victorian studies and disability studies This book expands current scholarly conversations around orality textuality and sound while demonstrating how understandings of disability contributed to Victorian constructions of normalcy Reading Victorian Deafness argues that deaf people were used as material test subjects for the Victorian process of understanding human language and by extension the definition of the human Evolution of an Unorthodox Rabbi John Moscovitz, 2015-10-31 A most unorthodox rabbi revisits twenty five turbulent years in Toronto s Reform Jewish community John Moscovitz is an unlikely rabbi who rejected a religious life as a teenager and spent his formative years as a social activist under the wing of a radical professor It is hard to say what path his life might have taken had not a spiritual awakening led him to devote his life to the service of the Jewish community This set him on a path to becoming one of Toronto s most cherished and effective rabbis over the past twenty five years For the congregants of Holy Blossom Temple Toronto s oldest Reform synagogue those twenty five years were a great blessing In the sermons he has gathered here Rabbi Moscovitz looks back at the temple and congregation he served for so long A most unconventional rabbi indeed he charts the rapid shifts in thinking on issues including same sex marriage peace between Israelis and Palestinians and gun control laws Part memoir part social history this book is also a deep examination of a long personal and public journey into the centre of an evolving community of faith *Language Myths, Mysteries and Magic* K. *The Quest for Symbolic Communication in Non-Human Animals* Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e g great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2 3 symbols can be trained to be understood by several species e g great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species

**The Origins of Self** Martin P. J. Edwardes, 2019-07-22 The Origins of Self explores the role that selfhood plays in defining human society and each human individual in that society It considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood Edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do The self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people Edwardes proposes that human construction of selfhood involves seven different types of self All but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness We rely on others to tell us about our self and even to let us know we are a self

Form and Object Tristan Garcia, 2014-03-17 What is a thing What is an object Tristan Garcia decisively overturns 100 years of Heideggerian orthodoxy about the supposedly derivative nature of objects to put forward a new theory of ontology that gives us deep insights into the world and our place in it
