Next Generation Intelligent Environments Stefan Ultes, Florian Nothdurft, Tobias Heinroth, Wolfgang Minker, 2015-11-30
This book covers key topics in the field of intelligent ambient adaptive systems. It focuses on the results worked out within the framework of the ATRACO Adaptive and TRusted Ambient eCOlogies project. The theoretical background, the developed prototypes and the evaluated results form a fertile ground useful for the broad intelligent environments scientific community as well as for industrial interest groups. The new edition provides Chapter authors comment on their work on ATRACO with final remarks as viewed in retrospective. Each chapter has been updated with follow up work emerging from ATRACO. An extensive introduction to state of the art statistical dialog management for intelligent environments. Approaches are introduced on how Trust is reflected during the dialog with the system. Next Generation Intelligent Environments Tobias Heinroth, Wolfgang Minker, 2011-08-28. Intelligent environments represent an emerging topic in research. Next Generation Intelligent Environments Ambient Adaptive Systems will cover all key topics in the field of intelligent ambient adaptive systems. It focuses on the results worked out within the framework of the ATRACO Adaptive and TRusted Ambient eCOlogies project. The theoretical background, the developed prototypes and the evaluated results form a fertile ground useful for the broad intelligent environments scientific community as well as for industrial interest groups. Features of the book include: A unique and original collection of chapters on intelligent ambient adaptive systems. Broad coverage of the field of intelligent environments research and evaluation as well as topics such as adaptation within activity spheres. Developed prototypes as examples for readers. Computer scientists, engineers and others who work in the area of ambient environments will find the edition interesting and useful to their own work. In addition, graduate students and Ph.D. students specializing in the area of intelligent environments may also use this book to get a concrete idea of the major issues to consider when developing intelligent environments in practice. Introducing Spoken Dialogue Systems into Intelligent Environments Tobias Heinroth, Wolfgang Minker, 2012-11-07. Introducing Spoken Dialogue Systems into Intelligent Environments outlines the formalisms of a novel knowledge driven framework for spoken dialogue management and presents the implementation of a model based Adaptive Spoken Dialogue Manager ASDM called OwlSpeak. The authors have identified three stakeholders that potentially influence the behavior of the ASDM: the user, the SDS and a complex Intelligent Environment IE consisting of various devices, services and task descriptions. The theoretical foundation of a working ontology based spoken dialogue description framework, the prototype implementation of the ASDM and the evaluation activities that are presented as part of this book contribute to the ongoing spoken dialogue research by establishing the fertile ground of model based adaptive spoken dialogue management. This monograph is ideal for advanced undergraduate students, PhD students and postdocs as well as academic and industrial researchers and developers in speech and multimodal interactive systems. *HCI International 2024 - Late Breaking Papers* Aaron Marcus, Elizabeth Rosenzweig, Marcelo M.
