Daniel, 2013-11-11 Rhinoplasty An Atlas of Surgical Techniques is a must read for surgeons at all levels who need to solve clinical problems and master the technical demands of rhinoplasty The author an internationally respected pioneer in rhinoplasty presents his own surgical technique in an easily accessible and clinically useful atlas Clear and concise with a strong emphasis on both split second decision making and surgical techniques this book

guides the surgeon through today's more complex and individualized operative plan employing a diversity of techniques. The atlas contains over 1 000 exquisite detailed intraoperative photographs and multi component illustrations to literally walk the reader through a variety of different procedures and complex cases including open structure techniques, closed rhinoplasty, open closed grafts and case studies. In addition, the atlas features a special section of step by step operative analysis for reduction, augmentation and balancing surgical procedures. This book is the definitive resource for the surgeon wanting to improve results for the resident and those learning rhinoplasty and for surgeons at all levels who wish to master the techniques essential to success in more difficult cases. *Pathology and Law* Gregory Davis, 2012-11-03

Almost all pathologists face legal issues when dealing with the specimens they work with on a day to day basis, whether it involves quality control and assurance in handling the specimens, facing the possibility of malpractice suits or serving as an expert witness in a trial. Written in an easy to read conversational tone with a dose of good humor, this book fills the need for a handbook that discusses the full spectrum of legal issues that many pathologists face, written from a pathologist's point of view. Organized in 12 user friendly chapters, the book begins with a comparison of Law and Medicine and explains the basics of the American Legal System. It continues with discussions of the impact of law on the practice of pathology, including such topics as specimens with potential legal implications, the controversy of saving organs for teaching, procuring and saving specimens for toxicology testing and DNA confirmation in identity testing. A must have section on malpractice suits covers reasons why patients sue, what to do if sued and reducing the chance of being sued. The author addresses expert witness testimony, including how to be an expert witness, conflicts of interest, conduct in a courtroom, what to say and what not to say. Quality control and assurance as it applies to the pathologist is also discussed. Legal implications for the information age, including the use of internet and e mail with regard to patient confidentiality, is discussed in detail. Case samples are scattered throughout the text to illustrate the principles discussed. Every term is defined in the glossary. *Resources in Education*, 1987

*Agricultural Pollution* Graham Merrington, Dr Linton Winder, Nfa, R. Parkinson, Mark Redman, L. Winder, 2002-08-22. This comprehensive text provides a concise overview of environmental problems caused by agriculture, such as pesticide pollution and increased nitrate levels, and offers practical solutions to them. It is well illustrated and contains a fully referenced introduction to the main contemporary agricultural pollution issues in the UK. It will help provide clear scientific and technical understanding of the most important sources of agricultural pollution. **Federal Register**, 2002-04
