*Basement Membranes*, 2015-11-24 Basement Membranes focuses on specialized extracellular matrices that provide the scaffolds used and required by cells to organize themselves into tissues and organs As basement membranes have been shown to be defective in numerous genetic and acquired diseases and to contribute to the microenvironment of both tumor cells and stem cells this book presents a view of specific basement membrane components and their roles in development and disease all written and commented on in chapters written by leaders in the basement membrane field Written by leading experts in the basement membrane field Contains original material both textual and illustrative that should become a very relevant reference material Presents material in a very comprehensive manner Ideal for both researchers in the field and general readers who will find relevant and up to date information

Diabetic Retinopathy - Advancement in Understanding the Pathophysiology and Management Strategies Mohd Nawaz, 2024-12-04 Diabetes is a leading global health problem Long term diabetes associated complications include nephropathy neuropathy and retinopathy Diabetic retinopathy DR is a disease that damages the tiny blood vessels in the retina and is a leading cause of blindness among diabetic adults worldwide Despite extensive laboratory and clinical investigations the fundamental root cause of vision loss due to diabetes remains uncertain Additionally the available treatment strategies including laser photocoagulation vitrectomy surgical removal of the epiretinal membranes and pharmaceutical approaches are either destructive or have limited efficacy Even current treatment interventions for advanced DR are limited Thus there is an urgent need for more research to understand what causes the initiation and progression of the disease and to explore new approaches for detection management and cost effective treatment of DR at its earliest stage rather than waiting for the onset of non manageable forms of vision threatening lesions This book Diabetic Retinopathy Advancement in Understanding the Pathophysiology and Management Strategies re examines the basics of DR explores the role of existing or potentially new dysregulated metabolic pathways or factors and discusses ways to improve current treatment strategies By presenting an inclusive view of DR s pathogenesis and the future of therapeutic strategies this book is designed to enhance the clinical care and quality of life for patients with diabetic retinopathy

**Autoimmune Bullous Diseases** Müzeyyen Gönül, Seray Çakmak, 2018-05-09 Autoimmune bullous diseases are a group of rare skin diseases characterized by intraepidermal and subepidermal bullae formations due to autoantibodies directed against the structural proteins of the epidermis or the dermal epidermal junction Early and correct diagnosis and adequate treatment of autoimmune bullous diseases are important as they cause morbidity and mortality in the affected patients This book which gives detailed information about autoimmune bullous diseases has two sections and nine chapters with sixteen contributing authors The first section describes the structure and tasks of desmosomes and basement membrane zone which consist of the major antigens of skin integrity targeted by autoantibodies The second section is about the epidemiology etiopathogenesis mucocutaneous histopathologic and laboratory findings and therapy of autoimmune bullous
