Watt, 2023-07-03 Higher education is facing a perfect storm as it contends with changing demographics shrinking budgets and concerns about access and cost while underrepresented groups both in faculty ranks and students are voicing dissatisfaction with campus climate and demanding changes to structural inequities This book argues that to address the inexorable changes ahead colleges and universities need both to centralize the value of diversity and inclusion and employ a set of strategies that are enacted at all levels of their institutions It argues that individual and institutional change efforts can only be achieved by implementing diversity as a value that is embracing social change efforts as central and additive rather than episodic and required and provides the research and theoretical frameworks to support this approach as well as tools and examples of practice that accomplish change The contributors to this book identify the elements that drive successful multicultural initiatives and that strengthen the effectiveness of campus efforts to dismantle systemic oppression as well as the individual and organization skills needed to manage difference effectively Among these is developing the capacity of administrators faculty and student affairs professionals as conscious scholar practitioners to sensitively manage conflicts on campus deconstruct challenging
