postgraduates of early modern China the history of East Asia and anyone interested in gaining a broader picture of the colorful Ming world and its inhabitants Empires of the Weak J. C. Sharman, 2020-11-10 What accounts for the rise of the state the creation of the first global system and the dominance of the West The conventional answer asserts that superior technology tactics and institutions forged by Darwinian military competition gave Europeans a decisive advantage in war over other civilizations from 1500 onward In contrast Empires of the Weak argues that Europeans actually had no general military superiority in the early modern era J C Sharman shows instead that European expansion from the late fifteenth to the late eighteenth centuries is better explained by deference to strong Asian and African polities disease in the Americas and maritime supremacy earned by default because local land oriented polities were largely indifferent to war and trade at sea Europeans were overawed by the mighty Eastern empires of the day which pioneered key military innovations and were the greatest early modern conquerors Against the view that the Europeans won for all time Sharman contends that the imperialism of the late nineteenth and early twentieth centuries was a relatively transient and anomalous development in world politics that concluded with Western losses in various insurgencies If the twenty first century is to be dominated by non Western powers like China this represents a return to the norm for the modern era Bringing a revisionist perspective to the idea that Europe ruled the world due to military dominance Empires of the Weak demonstrates that the rise of the West was an exception in the prevailing world order **Military Strategy** Jeremy Black, 2020-04-07 A global account of military strategy which examines the practices rather than the theories of the most significant military figures of the past 400 years Strategy has existed as long as there has been organised conflict In this new account Jeremy Black explores the ever changing relationship between purpose force implementation and effectiveness in military strategy and its dramatic impact on the development of the global power system Taking a total view of strategy Black looks at leading powers notably the United States China Britain and Russia in the wider context of their competition and their domestic and international strengths Ranging from France s Ancien Regime and Britain s empire building to present day conflicts in the Middle East Black devotes particular attention to the strategic practice and decisions of the Kangxi Emperor Clausewitz Napoleon and Hitler The Early Modern State: Drivers, Beneficiaries and Discontents Pepijn Brandon, Lex Heerma van Voss, Annemieke Romein, 2022-06-30 In the course of the early modern period the capacity of European states to raise finances wage wars subject their own and far away populations and exert bureaucratic power over a variety of areas of social life increased dramatically Nevertheless these changes were far less absolute and definitive than the literature on the rise of the modern state once held While war pushed the boundaries of the emerging fiscal military states of the seventeenth and eighteenth centuries rulers remained highly dependent on negotiations with competing elite groups and the private networks of contractors and financial intermediaries Attempts to increase control over subjects often resulted in popular resistance that in their turn set limits to and influenced the direction of the development of state institutions Written in honour of the leading

historian of war and state formation in the early modern Low Countries Marjolein t Hart the chapters gathered in this volume examine the main drivers beneficiaries and discontents of state formation across and beyond Europe in the early modern period

Power to the People Audrey Kurth Cronin,2020 Never have so many possessed the means to be so lethal The diffusion of modern technology robotics cyber weapons 3 D printing autonomous systems and artificial intelligence to ordinary people has given them access to weapons of mass violence previously monopolized by the state In recent years states have attempted to stem the flow of such weapons to individuals and non state groups but their efforts are failing Based on hard lessons from previous waves of weapons technology such as dynamite and the assault rifle Power to the People explains what the future may hold and how we should respond

The Use of Force for State Power Michael Warner,John Childress,2020-06-22 This book studies force the coercive application of power against resistance building from Thomas Hobbes observation that all self contained political orders have some ultimate authority that uses force to both dispense

justice and to defend the polity against its enemies This cross disciplinary analysis finds that rulers concentrate force through cooperation conveyance and comprehension applying common principles across history Those ways aim to keep foes from concerting their actions or by eliminating the trust that should bind them In short they make enemies afraid to cooperate and now they are doing so in cyberspace as well

The Military Revolution and Revolutions in Military Affairs Mark Fissel, 2022-12-05 The Military Revolution and Revolutions in Military Affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields Only a handful of publications consider the military revolution and the RMA in tandem This book breaks new ground conceptually and appeals to an exceptionally large and diverse readership Comparative revisionist studies of the military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is And for what it is shortly to become This book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively The connections with the Revolution in Military Affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems This is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence

History & Mathematics Jack A. Goldstone, Leonid E. Grinin, Andrey V. Korotayev, 2015-01-01 Among different important issues which are discussed in Political Demography the issue of global ageing becomes more and more pressing every year It is sufficient to take into account the point that within two forthcoming decades a rapid global increase in the number of retirement age persons will lead to its doubling within this fairly small historical period The concerns about population ageing apply to both developed and many developing countries and it has turned into a global issue In forthcoming decades the population ageing is likely to become one of the most important processes determining the future society characteristics and the direction of technological development The present volume of the Yearbook which is the fifth in the series is subtitled Political Demography II Facing Population Ageing We hope that this issue will be interesting and useful both for historians and mathematicians as well as for all those dealing with various social and natural sciences

The Dark Path Williamson Murray, 2024-10-22 From an esteemed military historian a sweeping history of the revolutions in war fighting that have shaped the modern world Heraclitus wrote that war is the father of all and it has formed much of the modern world Although the fundamental nature of war has not altered over the centuries constant change innovation and adaptation have repeatedly reshaped how wars are fought in the West Revolutions in military practice cannot be separated from larger social developments in areas like logistics finance and economics and the culture of military organizations In The Dark Path Williamson Murray argues that the history of warfare in the West hinged on five revolutions which both reflected the social political and economic conditions that produced them and in turn influenced how those

conditions evolved These five key turning points are the advent of the modern state which formed bureaucracies and professional militaries the Industrial Revolution which produced the financial and industrial means to sustain and equip large armies the French Revolution which provided the ideological basis needed to sustain armies through continent sized wars the merging of the Industrial and French Revolutions in the U S Civil War and the accelerating integration of technological advancement financial capacity ideology and government that unleashed the modern capacity for total warfare An ambitious work of synthesis this book shows how the world continually re creates war and how war in turn continually re creates the world *China's Grand Strategy Under Xi Jinping* Niv Horesh,2020-11-29 This book attempts to identify change and continuity in PRC grand strategy and the extent to which Chinese imperial history complicates PRC global outreach in the Xi Jinping era Empires convey the wish to make the world a better place even in the midst of oppression and are eschatological in their rhetoric However empires that last longer have been more pragmatic in their grand strategy sometimes appropriating the aura of past golden ages and at other times learning from the mistakes of their predecessors To date Chinese strategic thinkers are preoccupied with learning lessons from the disintegration of the USSR and fascinated by the secrets of American power Interdisciplinary in its reach analysing grand strategy through both rhetoric and praxis this book unpacks the Chinese world view through critical examination of the latest history textbooks currently in use in PRC middle schools It also brings new evidence to bear on the debate in the West about Chinese strategic culture Finally it compares historical Japanese OFDI patterns with China in order to understand what makes the Chinese economy unique China s Grand Strategy Under Xi Jinping is aimed towards students and scholars of history international business and wider Chinese studies

Intellectual Property and the Law of Nations, 1860-1920 ,2022-05-16 What was the state of the law and how states managed to fulfil their international legal obligations under the law of nations with respect to intellectual property protection 13 contributors show how the transition of intellectual property from private rights holders and their non state patrons evolves into state lawmaking The book presents these transitions through international legal perspectives and the history of intellectual property rights in late modern societies in Europe the United States Asia and Colonial States in Africa Contributors are Daniel Acquah Ainee Adam Louise Duncan Johanna Gibson Philip Johnson Jyh An Lee Yangzi Li P Sean Morris Peter Munkacsi Zvi Rosen Devanshi Saxena Johannes Thumfart and Esther van Zimmeren *Routledge Handbook of the Global History of Warfare* Kaushik Roy,Michael W. Charney,2024-01-23 This handbook examines key aspects of the development of the global history of warfare and the changing patterns of warfare over time Although scholarship has long eschewed a chronological narrative of the evolution of warfare that privileges the Western experience global histories of warfare have had difficulty avoiding an overemphasis on the West The present volume is a collection of themes rather than a history per se it provides important perspectives on the emergence of warfare as a global historical experience from the ancient past to the present day Drawing together numerous experts it tells a broader more inclusive story of the global

human experience with wars and warfare The 35 chapters are organised in eight thematic parts Part I Origins of Warfare Part II Politics and Armed Forces in the Pre Modern Era Part III Steppe Nomads of Eurasia Part IV Naval Warfare and Piracy in the Pre Industrial World Part V The Impact of Gunpowder Part VI Transition from Industrial to Total War Part VII Wars of Decolonisation and Cold War Part VIII Postmodern New Wars These Parts offer an overview of the global experience of warfare to help readers understand how the wars and the militaries we see today have been shaped by historical developments across the globe This handbook will be of great interest to students of military history naval history strategic studies and world history in general

How Europe Made the Modern World Jonathan Daly, 2019-10-03 One thousand years ago a traveler to Baghdad or the Chinese capital Kaifeng would have discovered a vast and flourishing city of broad streets spacious gardens and sophisticated urban amenities meanwhile Paris Rome and London were cramped and unhygienic collections of villages and Europe was a backwater How then did it rise to world preeminence over the next several centuries This is the central historical conundrum of modern times *How Europe Made the Modern World* draws upon the latest scholarship dealing with the various aspects of the West's divergence including geography demography technology culture institutions science and economics It avoids the twin dangers of Eurocentrism and anti Westernism strongly emphasizing the contributions of other cultures of the world to the West's rise while rejecting the claim that there was nothing distinctive about Europe in the premodern period Daly provides a concise summary of the debate from both sides whilst also presenting his own provocative arguments Drawing on a wide range of primary and secondary sources and including maps and images to illuminate key evidence this book will inspire students to think critically and engage in debates rather than accepting a single narrative of the rise of the West It is an ideal primer for students studying Western Civilization and World History courses
