Trivializing Teacher Education The Accreditation Squeeze presents a critical analysis of the National Council for Accreditation of Teacher Education NCATE This accreditation organization has been in existence for 50 years and claims to accredit approximately 700 teacher education programs that prepare two thirds of the nation s teachers There is no convincing research however that NCATE s stamp of approval makes a difference in teacher preparation programs or in beginning teachers competencies There is evidence that NCATE is masterful at self promotion marketing and aligning itself with policy makers and politicians This book illustrates the questionable NCATE processes and requirements and exposes the exorbitant costs accrued by universities seeking NCATE accreditation It points out that the NCATE standards do not address the major issues that impact teaching and learning The book highlights NCATE s support of teacher testing in the face of evidence that such tests lack predictive validity It shows how NCATE is reaching out to accredit for profit organizations and how it sends its evaluators to review international programs in the Middle East The book calls on NCATE to make the professional backgrounds of its examiners reviewers board members and staff transparent It addresses the attention teacher educators must devote to mindless trivial NCATE demands that usurp time that should be spent on their students and their research This book urges teacher educators college faculties and administrators state education officials and legislators parents of school age children and concerned citizens to open their eyes to this powerful organization NCATE and to examine what it has done to teacher education in the last half century

The dynamics of immigration international commerce and the postcolonial world make it inevitable that much translation is done into a second language despite the prevailing wisdom that translators should only work into their mother tongue This book is the first study to explore the phenomenon of translation into a second language in a way that will interest applied linguists translators and translation teachers and ESOL teachers working with advanced level students Rather than seeing translation into a second language as deficient output this study adopts an interlanguage framework to consider L2 translation as the product of developing competence learning to translate is seen as a special variety of second language acquisition Through carefully worked case studies separate components of translation competence are identified among them the ability to create stylistically authentic texts in English the ability to monitor and edit output and the psychological attitudes that the translator brings to the task While the case studies mainly deal with Arabic speakers undergoing translator training in Australia the conclusions will have implications for translation into a second language especially English around the world Translation into the Second Language is firmly grounded in empirical research and in this regard it serves as a stimulus and a methodological guide for further research It will be a valuable addition for advanced undergraduate and postgraduate students of applied linguistics translation theory bilingualism and second language

acquisition as well as those involved in teaching or practicing translation at a professional level
