Programming 101 Jeanine Meyer, 2018-06-15 Understand the importance of programming even if you've never programmed before This book will teach you the basics of programming using the Processing programming language You will create your own Processing sketches using personal images themes or hobbies that you enjoy The chapters in the book will demonstrate the process of programming starting with formulating an idea planning building on past projects and refining the work similar to writing an essay or composing a song This approach will guide you to make use of logic and mathematics to produce beautiful effects The term for program in Processing is sketch though the sketches featured in this book are far more than static drawings they incorporate interaction animation video audio and accessing files on the local computer and on the Web Technical features are introduced and explained in the context of complete examples games Snake Hangman jigsaw slingshot making a collage of family images and video clips preparing directions for folding an origami model rotating objects in 3D and others Programming is a fun creative expressive pursuit It requires attention to details and can be frustrating but there is very little that compares to the satisfaction of building a program out of nothing and making it work or taking an existing program and fixing a problem or adding a feature and making it better Programming 101 is your gateway to making this happen What You Will Learn Gain basic programming skills Build fun and creative programs Use files for making a holiday card Combine videos images and graphics in a Processing sketch Who This Book Is For Anyone who has been thinking about trying programming or has tried but needs more motivation anyone who wants to learn about the Processing language

Cryptographic Hardware and Embedded Systems - CHES 2002 Burton S. Jr. Kaliski, Cetin K. Koc, Christof Paar, 2003-08-02 These are the proceedings of CHES 2002 the Fourth Workshop on Cryptographic Hardware and Embedded Systems After the first two CHES Workshops held in Massachusetts and the third held in Europe this is the first Workshop on the West Coast of the United States There was a record number of submissions this year and in response the technical program was extended to 3 days As is evident by the papers in these proceedings there have been again many excellent submissions Selecting the papers for this year's CHES was not an easy task and we regret that we could not accept many contributions due to the limited availability of time There were 101 submissions this year of which 39 were selected for presentation We continue to observe a steady increase over previous years 42 submissions at CHES 99 51 at CHES 2000 and 66 at CHES 2001 We interpret this as a continuing need for a workshop series that combines theory and practice for integrating strong security features into modern communications and computer applications In addition to the submitted contributions Jean Jacques Quisquater UCL Belgium Sanjay Sarma MIT USA and a panel of experts on hardware random number generation gave invited talks As in the previous years the focus of the Workshop is on all aspects of cryptographic hardware and embedded system security Of special interest were contributions that describe new methods for efficient hardware implementations and high speed software for embedded systems e.g. smart cards microprocessors DSPs etc

CHES also continues to be an important forum for new theoretical and practical findings in the important and growing field of side channel attacks
