The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education. The author, a physics professor, examines two related trends in education: the practice of data-driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology. Many of the reforms being foisted on educators have more in common with pseudo science than real science. The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general. How is it possible for schools with all students learning at grade level to be rated as failing, teachers to be rated as ineffective after all their students meet their learning outcomes, rising grade school math standards to result in more college students needing remedial math, politicians to disparage scientists and their results but argue that more students should study science? These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies. This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized, optimized, and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students.

Featuring leading and emerging scholars in English language arts teacher education, each chapter provides rich and concrete examples of elementary and secondary methods courses rooted in contemporary research and theory, on-line resources, and honest appraisals of the possibilities, tensions, and limits of doing teacher education differently in a top-down time of standards-based education, high-stakes testing, teacher assessment, and neoliberal education reforms. This book offers important resources and support for teacher educators and graduate students to explore alternative visions for aligning university methods courses with current trends in English and cultural studies, critical sociocultural literacy, new literacies, and web 2.0 tools and teaching the English language arts in multiethnic, multilingual, and underserved urban communities. *Critical Literacy Practice* Bogum Yoon, Rukhsar Sharif, 2015-08-17 This edited book shows how critical literacy can be applied in and outside the classroom setting. It shows educators how critical theory is applied in practice using studies in diverse K-16 settings, kindergarten through university contexts. By providing specific examples of critical literacy practice in the classroom and beyond, the book aims to help teachers, researchers, and teacher educators make clear connections between theory and practice in critical literacy. *New York School Journal*, 1893 **Effective Grading Practices for Secondary Teachers** Dave Nagel, 2015-03-04 Enact innovative grading systems that more accurately describe student progress. This book challenges traditional grading practices and provides alternatives that can have direct impact on student success. By making subtle shifts toward standards-based grading systems, schools can reduce unnecessary course failures, provide students and their families a more accurate

picture of current progress and increase opportunities for success The author offers a range of grading reform strategies that are built from practical frameworks that are effective and simple to adapt Among the many strengths of this book are Practical application of existing research and evidence base for effective secondary grading reforms A framework for schools and districts to apply and adapt failure prevention strategies such as early failure detection Amnesty Days and meaningful stipulated second chance opportunities for students to reach mastery Functional strategies and actions for shifting toward standards based referenced grading without entirely abandoning letter grades Countering resistance to change through a clearly articulated plan for conducting school wide and classroom level action research around the effectiveness of new or adjusted grading practices Informative and pragmatic this book is spot on with analysis of this elephant in the room issue Nagel uses both empathy and humor in getting to the heart of a process to generate real solutions while underscoring the ultimate need for teacher voice in any successful implementation He provides ready made strategies for real impactful change I m left hopeful that feedback will rule the day Bruce Potter Superintendent Berkshire UFSD Nagel offers an insightful and articulate voice to secondary improvement and alignment through grading practices His tried and true methods through working with real districts provides a starting place and examples for others to follow A must read for anyone serious about ensuring student engagement through meaningful feedback Debra K Howe Superintendent Tri Creek School Corporation
