boundaries for their work These are places where social and cultural interests and concerns are translated into policies and practice The clinics are open social systems responding to and influencing discussions This book combines organization theory sociological theory gender theory science and technology studies and philosophy It emphasises the critical importance of a sociomaterial perspective on organization stressing how material and social resources are always of necessity folded into each other in day to day organizing A Biographical Encyclopedia of Contemporary Genocide Paul R. Bartrop,2012-07-06

diasporas in contemporary literature and film Alberto Fernández Carbajal,2019-07-04 This book explores the representation of queer migrant Muslims in international literature and film from the 1980s to the present day Bringing together a variety of contemporary writers and filmmakers of Muslim heritage engaged in vindicating same sex desire the book approaches queer Muslims in the diaspora as figures forced to negotiate their identities according to the expectations of the West and of their migrant Muslim communities The book examines 3 main themes the depiction of queer desire across racial and national borders the negotiation of Islamic femininities and masculinities and the positioning of the queer Muslim self in time and place This study will be of interest to scholars as well as to advanced general readers and postgraduate students interested in Muslims queerness diaspora and postcolonialism It brings nuance and complexity to an often simplified and controversial topic *Feminist Posthumanism in Contemporary Science Fiction Film and Media* Julia A. Empey,Russell J.A.

Kilbourn,2023-08-24 *Feminist Posthumanism in Contemporary Science Fiction Film and Media* From Annihilation to High Life and Beyond places posthumanism and feminist theory into dialogue with contemporary science fiction film and media This essay collection is intimately invested in the debates around the posthuman and the critical posthumanities within a feminist critical theoretical framework In this posthumanist light science fiction as a genre allows for new imaginings of

human technological relations while it can also be the site of a critique of human exceptionalism and essentialism. In this way, science fiction affords unique opportunities for the scholarly investigation of the relevance and relative applicability of specific posthumanist themes and questions in a particularly rich and wide-ranging popular cultural field of production. One of the reasons for this suitability is the genre's historically longstanding relationship with the critical investigation of gender, specifically the position and relative empowerment of women. The original analyses presented here pay close attention to audiovisual style, including game mechanics, facilitating the critical interrogation of the issues and questions around posthumanism. Where typically the mention of SF in the posthumanist context calls to mind a whole set of often clichéd tropes, the cyborg, technologically augmented bodies, AI subjectivities, etc., this volume's thirteen chapters analyze specific examples of contemporary SF cinema that engage in meaningful ways with the burgeoning field of critical posthumanism and that utilize such films to interrogate posthumanist and feminist as well as humanistic ideas.
