Development of an Environmental and Economic Assessment Tool (Enveco Tool) for Fire Events Francine Amon,Jonatan Gehandler,Selim Stahl,Mai Tomida,Brian Meacham,2016-08-02 This book investigates the feasibility of developing a tool that enables fire departments to estimate the value of their services to a community in terms of environmental and financial impact This book provides a summary of this effort which resulted in development of a prototype tool for fire department use The impact of fire on a community is usually measured in terms of the number of fires human casualties and property damage There are however more subtle impacts of fire that are not so easily estimated but contribute to the measure of overall performance of the fire service in protecting a community While environmental and economic impact assessment methodologies exist as separate systems they generally require a high level of knowledge that is outside the scope of most fire departments A relatively simple methodology for estimating the environmental and economic impact of fires helps communities understand the degree to which fire department activities can benefit a community s environmental and economic well being The scope and approach for this prototype tool is explained including risk assessment cost benefit analysis life cycle assessment integration and implementation and sensitivity and uncertainty analysis It includes multiple case studies and offers statistical support for future expansion of the tool Fire service professionals will find this a useful new approach to presenting value in a community as well as a method for examining their own financial and environmental plans
