Animal, Vegetable, Digital Elizabeth Swanstrom, 2016 An audacious interdisciplinary study that combines the burgeoning fields of digital aesthetics and eco criticism Nordic Childhoods in the Digital Age Kristiina Kumpulainen, Anu Kajamaa, Ola Erstad, Åsa Mäkitalo, Kirsten Drotner, Sólveig Jakobsdóttir, 2022-07-05 This book adds to the international research literature on contemporary Nordic childhoods in the context of fast evolving technologies It draws on the workshop program of the Nordic Research Network on Digital Childhoods funded by the Joint Committee for Nordic research councils in the Humanities and Social Sciences NOS HS during the years 2019 2021 Bringing together researchers from Finland Norway Sweden Denmark and Iceland the book addresses pressing issues around children's communication learning and education in the digital age The volume sheds light on cultural values educational policies and conceptions of children and childhood and child media relationships inherent in Nordic societies. The book argues for the importance of understanding local cultures values and communication practices that make up contemporary digital childhoods and extends current discourses on children's screen time to bring in new insights about the nature of children's digital engagement This book will appeal to researchers graduate students educators and policy makers in the fields of childhood education educational technology and communication The Open Access version of this book available at www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license Ecological Film Theory and Psychoanalysis Robert Geal, 2021-07-12 This book applies ecolinguistics and psychoanalysis to explore how films fictionalising environmental disasters provide spectacular warnings against the dangers of environmental apocalypse while highlighting that even these apparently environmentally friendly films can still facilitate problematic real world changes in how people treat the environment Ecological Film Theory and Psychoanalysis argues that these films exploit cinema s inherent Cartesian grammar to construct texts in which not only small groups of protagonist survivors but also vicarious spectators pleasurably transcend the fictionalised destruction The ideological nature of the lifeboats on which these survivors escape moreover is accompanied by additional elements that constitute contemporary Cartesian subjectivity such as class and gender binaries restored nuclear families individual as opposed to social responsibilities for disasters and so on The book conducts extensive analyses of these processes before considering alternative forms of filmmaking that might avoid the dangers of this existing form of storytelling The book s new ecosophy and film theory establishes that Cartesian subjectivity is an environmentally destructive symptom that everyday linguistic activities like watching films reinforce This book will be of great interest to students and scholars of film studies literary studies specifically ecocriticism cultural studies ecolinguistics and ecosophy Contemporary Archipelagic Thinking Michelle Stephens, Yolanda Martínez-San Miguel, 2020-09-15 Contemporary Archipelagic Thinking takes as point of departure the insights of Antonio Ben tez Rojo Derek Walcott and Edouard Glissant on how to conceptualize the Caribbean as a space in which networks of islands are constitutive of a
