Postwar Emigration to South America from Japan and the Ryukyu Islands Pedro Iacobelli, 2017-07-13 Placing a distinct focus on the role of the sending state this book examines the history of postwar Japan s migration policy linking it to the larger question of statehood and nation building in the postwar era Pedro Iacobelli delves into the role of states in shaping migration flows by exploring the genesis of the state led emigration from Japan and the US administered Ryukyu Islands to South America in the mid 20th century The study proposes an alternative political perspective on migration history to analyze the rationale and mechanisms behind the establishment of migration programs by the sending state To develop this perspective the book examines the state s emigration policies their determinants and their execution for the Japanese and Okinawan migration programs to Bolivia in the 1950s It argues that the post war migration policies that established those migration flows were a result of the political cost benefit calculations rather than only economic factors of the three governments involved With its unique focus on the role of the sending state and the relationship between Japan Okinawa and the United States this is a valuable study for students and scholars of postwar Japan and migration history

within and beyond the state that participate in the design and implementation of diaspora policies as well as the mechanisms through which diasporas are constructed by governments political parties diaspora entrepreneurs or international organisations Extant theories are often hard pressed to capture the empirical variation and often end up identifying exceptions The multidisciplinary group of contributors in this book theorise these exceptions through three interrelated conceptual moves first by focusing on understudied aspects of the relationships between states as well as organised non state actors and their citizens or co ethnics abroad or at home in cases of return migration Second by examining dyads of origin states and specific diasporic communities differentiated by time of emigration place of residence socio economic status migratory status generation or skills Third by considering migration in its multiple spatial and temporal phases emigration immigration transit return and how they intersect to constitute diasporic identities and policies These conceptual moves facilitate comparative research and help scholars identify the mechanisms connecting structural variables with specific policies by states and other actors as well as responses by the relevant diasporic communities This book was originally published as a special issue of the Journal of Ethnic and Migration Studies Constructed Movements Ragini Shah,2024-12-03 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more At once theoretically sophisticated and poignantly written Constructed Movements centers stories from communities in Mexico profoundly affected by emigration to the United States to show how migration extracts resources along racial lines Ragini Shah chronicles how three interrelated dynamics the maldistribution of public resources the exploitation of migrant labor and the US immigration enforcement regime entrench the necessity of migration as a strategy for survival in Mexico She also highlights the alternative visions elaborated by migrant community organizations that seek to end the conditions that force migration Recognizing that reform without recompense will never right an unjust migratory system Shah concludes with a forceful call for the US and Mexican governments to make abolitionist investments and reparative compensation to directly counteract this legacy of extraction

Migration policies are rarely effective Examples of unintended and undesirable outcomes abound In Latin America very little is known about the impact and long term sustainability of state policies towards emigrants Following a world wide trend Ecuador Uruguay Mexico Argentina and Brazil have developed new institutions and discourses to strengthen links assist protect and enfranchise migrants and capture their resources As an adaptation of governmental techniques to global realities these policies redefine the contours of politics nations and citizenship giving place to a new form of transnational governance Building upon field research done in these five states and two receiving countries in the last decade Ana Margheritis explains the timing motivations characteristics and implications of emigration policies implemented by each country as well as the emergence of a distinctive regional consensus around a post neoliberal approach to national development and citizenship construction Margheritis argues that these outreach efforts resemble courting practices Courting is a deliberate expression of the ambivalent still incipient and open ended relationship between states and diasporas which is not exempt of conflict detours and setbacks For various reasons state diaspora relations are not unfolding into stable and fruitful partnerships yet Thus she makes diaspora engagement problematic and investigates to what extent courting might become engagement in each case Studying emigration policies of five Latin American countries and migrant responses in Southern Europe sheds light on the political dynamics and governance mechanisms that transnational migration is generating across regions It illuminates possible venues to manage multiple engagements of migrants with societies at both ends of their migration journey and unveils the opportunities for states and non state actors to cooperatively manage of migration flows

Mexican Exodus Julia G. Young, 2015-07-01 In the summer of 1926 an army of Mexican Catholics launched a war against their government Bearing aloft the banners of Christ the King and the Virgin of Guadalupe they equipped themselves not only with guns but also with scapulars rosaries prayers and religious visions These soldiers were called *cristeros* and the war they fought which would continue until the mid 1930s is known as *la Cristiada* or the *Cristero* war The most intense fighting occurred in Mexico's west central states especially Jalisco Guanajuato and Michoacán For this reason scholars have generally regarded the war as a regional event albeit one with national implications Yet in fact the *Cristero* war crossed the border into the United States along with thousands of Mexican emigrants exiles and refugees In *Mexican Exodus* Julia Young reframes the *Cristero* war as a transnational conflict using previously unexamined archival materials from both Mexico and the United States to investigate the intersections between Mexico's *Cristero* War and Mexican migration to the United States during the late 1920s She traces the formation actions and ideologies of the *Cristero* diaspora a network of Mexicans across the United States who supported the Catholic uprising from beyond the border These *Cristero* supporters participated in the conflict in a variety of ways they took part in religious ceremonies and spectacles organized political demonstrations and marches formed associations and organizations and collaborated with religious and political leaders on both sides of the border Some of them even launched militant efforts that included arms smuggling military recruitment espionage and armed border revolts Ultimately the *Cristero* diaspora aimed to overturn Mexico's anticlerical government and reform the Mexican Constitution of 1917 Although the group was unable to achieve its political goals Young argues that these emigrants and the war itself would have a profound and enduring resonance for Mexican emigrants impacting community formation political affiliations and religious devotion throughout subsequent decades and up to the present day
