Handbook of Digital Forensics of Multimedia Data and Devices, Enhanced E-Book Anthony T. S. Ho, Shujun Li, 2016-05-20

Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever more apparent. Digital forensics involves investigating computer systems and digital artefacts in general while multimedia forensics is a sub topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics bringing two closely related fields of forensic expertise together to identify and understand the current state of the art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification and image forgery detection among many others.

Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices. Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices. Offers not only explanations of techniques but also real world and simulated case studies to illustrate how digital and multimedia forensics techniques work. Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies.

Policing Sexual Offences and Sex Offenders Terry Thomas, 2016-08-13

Sexual offending has become a mainstay item of reporting in our daily newspapers and television news bulletins. This book offers an account of the policing of sexual offences and the difficulties that confront the police in the investigation of these intrusive crimes. It surveys the breadth of sexual offences and examines the reporting of sexual crime and the attrition level that follows. It proceeds by critically assessing the efforts the police are making to overcome these difficulties and the degree to which they are making progress. The book outlines the relatively new police role of policing the convicted sex offenders themselves who are living in the community and are subject to risk management by the police and the requirements of the sex offender register held by the police. Written by a leading expert, this timely book will be of great interest to scholars of sexual offending and criminal justice.

Police Response to Riots Garth den Heyer, 2019-11-13

This book is a study of the response that the police take to modern urban riots. It takes a principally police perspective on the lead up to a riot, the police response and the evaluation of the police response. The book is based on the development and analysis of four extensive case study riots: France 2005, London 2011, Ferguson 2014 and Baltimore 2015. The methodological approach to the case studies is comparative and includes an interactive framework that incorporates a number of key variables. These variables examine how each riot began

how they developed the response strategies and tactics used by the police and how the riots eventually ended The first section looks at defining riots and examines the riot literature and research to date The second section analyses the current police response to rioting The third and final section includes an analysis and comparison of the case study riots along with an examination of how the police response to riots could be improved With its focus on police practices this unique volume will be useful for researchers students police law enforcement and policy makers
