The Coming of Materials Science R.W. Cahn, 2001-03-16 The Coming of Materials Science both covers the discipline of materials science and draws an impressionistic map of the present state of the subject The first chapter examines the emergence of the materials science concept in both academe and industry The second and third chapters delve back into the prehistory of materials science examining the growth of such concepts as atoms crystals and thermodynamics and also examine the evolution of a number of neighbouring disciplines to see what helpful parallels might emerge The book contains numerous literature references Many refer to the earliest key papers and books while others are to sources often books offering a view of the present state of a topic Early references are to the past but as the book continues it brings the reader up to date with more recent sources The author Professor Robert Cahn FRS has striven to be critical about the history of the discipline of materials science and to draw general conclusions about scientific practice from what he has discovered about the evolution of materials science Further issues that the book highlights include What is a scientific discipline How do disciplines merge and differentiate Can a discipline also be interdisciplinary Is materials science a real discipline A large range of themes is presented in the book and readers are invited to interact with the author if they reach alternative conclusions This book is not just for reading and reference but exists to stimulate thought and provoke discussion as well [Problem Based Learning Discussions in Neuroanesthesia and Neurocritical Care](#)

Hemanshu Prabhakar, Shobana Rajan, Indu Kapoor, Charu Mahajan, 2020-03-10 This book presents a student centric problem based approach to learning key issues in neuroanesthesia and neurocritical care a concept that is gaining popularity and acceptance in the medical education field Each chapter starts with a brief case scenario describing the condition followed by series of questions and answers covering important aspects like differential diagnosis associated co morbidity preoperative evaluation and preparation intraoperative anesthetic management postoperative management and prognosis Featuring questions to engage readers and providing answers based on reason and supported by evidence and references the book is a valuable educational aid for trainees and residents It also offers insights into the real world clinical situations making it of interest to practicing anesthesiologists and neuroanesthesiologists
