Zelicoff, Michael Bellomo, 2005 Whether a virus is unintentionally released via our modern transportation system or deliberately by terrorists even a small scale biological event could have a profound effect on our society Yet our current public health system is completely unprepared to detect and respond quickly enough to avert a disease related crisis Taming the Next Set of Strategic Weapons Threats Henry D. Sokolski, 2006 Missile defense and unmanned air vehicle related technologies are proliferating for a variety of perfectly defensive and peaceful civilian applications This same know how can be used to defeat U S and allied air and missile defenses in new ways that are far more stressful than the existing set of ballistic missile threats Unfortunately the Missile Technology Control Regime is not yet optimized to cope with these challenges Nuclear technologies have become much more difficult to control since new centrifuge uranium enrichment facilities and relatively small fuel reprocessing plants can now be built and hidden much more readily than nuclear fuel making plants that were operating when the Nuclear Nonproliferation Treaty and the bulk of International Atomic Energy Agency inspections procedures were first devised 30 or more years ago This volume is designed to highlight what might happen if these emerging threats go unattended and how best to mitigate them **Disinfection and Decontamination** Gurusamy Manivannan, 2007-10-04 In the battle between humans and microbes knowledge may be not only the best weapon but also the best defense Pulling contributions from 34 experts into a unified presentation Disinfection and Decontamination Principles Applications and Related Issues provides coverage that is both sophisticated and practical The book reviews the fund Biological Agents Shiv Kant Prasad, 2009 **The Prepper Next Door** Charlie Palmer, 2012 A book for practical preppers those planning for emergencies or disasters Discusses food storage water purification and collection sanitation first aid bug out bags bug out vehicles home and self defense firearms and shooting providing lights and utilities and aspects of home construction AUTHOR BIO Charlie Palmer became a prepper back in the early 1980s when he first read The Survivor newsletter Today he recommends people make modest preparations for natural disasters and other emergencies His interests include do it yourself repairs shooting welding machining and outdoor survival Phase Six Jim Shepard, 2021 In a tiny settlement on the west coast of Greenland 11 year old Aleq and his best friend frequent trespassers at a mining site exposed to mountains of long buried and thawing permafrost carry what they pick up back into their village and from there Shepard s harrowing and deeply moving story follows Aleq one of the few survivors of the initial outbreak through his identification and radical isolation as the likely index patient While he shoulders both a crushing guilt for what he may have done and the hopes of a world looking for answers we also meet two Epidemic Intelligence Service investigators dispatched

from the CDC Jeannine an epidemiologist and daughter of Algerian immigrants and Danice an MD and lab wonk As they attempt to head off the cataclysm Jeannine moving from the Greenland hospital overwhelmed with the first patients to a Level 4 high security facility in the Rocky Mountains does what she can to sustain Aleq Publisher s description **Deadly Baggage** Al Sandine,2015-08-11 In 1519 a few hundred Europeans led by Hernan Cortes sailed from Cuba to the Mexican mainland where they encountered representatives of the Aztec Empire Their Iberian history culture and religion and their experience in the Greater Antilles made conquest and riches the aim of these adventurers They regarded themselves as heroes in a romantic crusade of good against evil Each member of the expedition sought to acquire precious metals and to become a lord of enslaved native labor Their horses and steel swords aided by native disunity and susceptibility to Old World diseases ensured their success This analysis of the conquest of Mexico stands in contrast to previous narratives that either reduce the conquest to a contest between Cortes and Montezuma or describe a near miraculous victory of European ingenuity and Western values over Indian superstition and savagery The author re frames the clash of civilizations in New World prehistory that left inhabitants at a disadvantage *Deadly Viruses* Erin L. McCoy,2018-12-15 Since before history began the human species has been waging a war Viruses have claimed countless lives and have swept through civilizations in deadly pandemics Certain viruses such as Ebola hantavirus and strains of influenza still pose a threat today Some scientists believe that a large outbreak of an extremely deadly infectious disease is likely to occur soon A virus could either develop naturally or be created by terrorists or hostile states for use as a weapon This book uses photographs sidebars and a glossary to explain the most pressing of these threats we face today and what individuals and organizations are doing to prevent an outbreak *Monitoring the Health of Populations by Tracking Disease Outbreaks* Steven E Rigdon,Ronald D. Fricker, Jr.,2020-01-31 With COVID 19 sweeping across the globe with near impunity it is thwarting governments and health organizations efforts to contain it Not since the 1918 Spanish Flu have citizens of developed countries experienced such a large scale disease outbreak that is having devastating health and economic impacts One reason such outbreaks are not more common has been the success of the public health community including epidemiologists and biostatisticians in identifying and then mitigating or eliminating the outbreaks *Monitoring the Health of Populations by Tracking Disease Outbreaks* Saving Humanity from the Next Plague is the story of the application of statistics for disease detection and tracking The work of public health officials often crucially depends on statistical methods to help discern whether an outbreak may be occurring and if there is sufficient evidence of an outbreak then to locate and track it Statisticians also help collect critical information and they analyze the resulting data to help investigators zero in on a cause for a disease With the recent outbreaks of diseases such as swine and bird flu Ebola and now COVID 19 the role that epidemiologists and biostatisticians play is more important than ever Features Discusses the crucial roles of statistics in early disease detection Outlines the concepts and methods of disease surveillance Covers surveillance techniques for communicable diseases like

Zika and chronic diseases such as cancer Gives real world examples of disease investigations including smallpox syphilis anthrax yellow fever and microcephaly and its relationship to the Zika virus Via the process of identifying an outbreak finding its cause and developing a plan to prevent its reoccurrence this book tells the story of how medical and public health professionals use statistics to help mitigate the effects of disease This book will help readers understand how statisticians and epidemiologists help combat the spread of such diseases in order to improve public health across the world
