Professor Peter Tomlinson University of Leeds There is growing interest in the possibilities of combining research approaches in education and social sciences as dissatisfaction mounts with the limitations of traditional mono method studies and with the schism between quantitative and qualitative methods This book argues the case for combining multiple research methods and provides much needed practical guidance for researchers who want to use this mixed methods approach The authors believe that all research has an over arching logic and that within this the fruitful combination of quantitative and qualitative methods is possible They develop the idea of the new education and social researcher for whom the combination of approaches is a representation of a diverse skills base rather than a matter of ideological or theoretical allegiance The book outlines and evaluates methods that are currently used and looks at combining different methods across and within studies including complex interventions Bayesian approaches new political arithmetic triangulation life histories and design studies It offers a radical new and very simple way of working with numbers Drawing on examples across the social sciences this book is key reading for undergraduate and postgraduate students in Education and social science courses with a research element as well as academics and professionals undertaking research projects **Approaches to Social**
