Feiwel, 2012-12-06 This is not a festschrift but a study of the prodigious Samuelson phenomenon his history making contributions to and impact on the economics of our age and the intricate often perplexing and divergent trends in modern economics all intensely controversial subjects that will be argued scrutinized and periodically reassessed by economists of various strands and traditions for years to come for as Samuelson wrote of Pigou immortality does have its price A scholar with such an outstanding body of contributions must expect other men to swarm about it 1966 p 1233 subject it to scholarly scrutiny and challenge it Although Paul Samuelson was 65 on May 15 1980 and our best wishes go out to him for long life and continued enrichment of economics this is neither a birthday party nor a gathering of only the Good Fairies for as he himself has said of Marx a great scholar deserves the compliment of being judged seriously and critically 1972 p 268 In accordance with the rule of Roman law *audiatur et altera pars* I have invited representative scholars of widely divergent perceptions to offer their critical evaluation of the age of Samuelson While the response was by and large gratifying some scholars were unable to meet the deadline ix x PREFACE and with much compunction I have had to expand

my own essays to partly fill the gaps Preferences and Democracy Alb. Breton, P. Galeotti, P. Salmon, R. Wintrobe, 2012-12-06

Until about a dozen years ago the economic analysis of the relationship between political preferences and political demands was a rather straightforward if dull subject. The most common assumption was that the only political instrument available to citizens was the vote. Given this assumption, the analyst could express the outcome of the voting process in one of two ways. One possibility was to make the heroic assumptions necessary to obtain the median voter theorem, in which case the political demands of the citizenry are simply the preferences of the median voter. The alternative was to make Arrow's Impossibility Theorem in which case, even though individual preferences are well ordered, no collective preference function exists. On either of these approaches, institutions such as interest groups, political parties, or the structures of political representation played no role in the analysis. The work of Chicago scholars, especially George Stigler, Gary Becker, and Sam Peltzman, took a different approach and emphasized the importance of organization in making political demands effective, shifting the focus from voting to political pressure by interest groups. However, in these models, voting as an instrument of political action simply disappears, and the relationship between interest group pressures and electoral processes has never been clarified.
