Bowman, 2017-01-24 This is the latest in an important series of reviews going back to 1928 The book contains 28 chapters written by experts in their field and reviews developments in the principal aspects of British librarianship and information work in the years 2011 2015

Technology for the School Librarian William O. Scheeren, 2010-01-22 The world of the school librarian has changed significantly over the past ten years with the proliferation of technology into all phases of education this book attempts to address these issues What does a school librarian need to know about technology Technology for the School Librarian Theory and Practice is an introduction to all aspects of technology in the school library and provides a starting point for further study of this wide ranging and critically important field The only book that addresses both the theoretical and the practical aspects of the subject Technology for the

School Librarian is organized into 13 chapters describing the most vital topics in technology for school librarians. Within these chapters, school librarians, whether practicing or prospective, will be introduced to the practical aspects of technology in the school library and presented with a theoretical framework that will allow them to continue their research and learning. Case studies facilitate understanding, as do the study questions included with each chapter.

Library and Information Science Michael F. Bemis, 2014-03-03 This unique annotated bibliography is a complete up-to-date guide to sources of information on library science, covering recent books, monographs, periodicals, and websites, and selected works of historical importance. In addition to compiling an invaluable list of sources, Bemis digs deeper, examining the strengths and weaknesses of key works. A boon to researchers and practitioners alike, this bibliography includes coverage of subjects as diverse and vital as the history of librarianship, its development as a profession, the ethics of information science, cataloging, reference work, and library architecture. Encompasses encyclopedias, dictionaries, directories, photographic surveys, statistical publications, and numerous electronic sources, all categorized by subject. Offers appendixes detailing leading professional organizations and publishers of library and information science literature. This comprehensive bibliography of English language resources on librarianship, the only one of its kind, will prove invaluable to scholars, students, and anyone working in the field.

Teaching with Technology Joe M. Williams, Susan Goodwin, 2007-08-14 Instruction and technology both play integral roles in librarianship today. There are many books addressing teaching within the library, and many more that provide librarians with an overview of current technologies. This handbook strives to bring these two relevant topics together in a practical overview of instructional uses and applications of today's popular technologies. The book is not designed to be read cover to cover but referred to over time as the reader considers incorporating a particular technology in instruction, such as establishing an instruction blog or perhaps begins reflecting on current uses of a familiar product or service, such as chat-based reference introduction.

Web-Based Instruction Susan Sharpless Smith, 2010-07-09 This updated edition of the classic covers new tools and trends, including current browsers, access methods, hardware, and software. Includes tips to secure project funding and provides strategic guidance for all types of libraries.
