Listening with Purpose Jack Danielian, Patricia Gianotti, 2012-04-12 This manual has been written for a wide range of dynamic practitioners involved in treating patients with narcissistically infused issues The treatment model and case material presented in *Listening with Purpose* cover the spectrum of narcissistic vulnerability and may be applied to the relatively intact patient as well as to the relatively impaired patient Throughout it refers to issues of narcissistic vulnerability from a perspective that assumes narcissistic mechanisms are implicated in all levels of personality functioning and in all people They exist both in therapists and clients differing only in the level of prominence and degree of disturbance in the personality Cutting across several schools of thought this treatment manual places shame and its derivatives at the very center of narcissistic vulnerabilities vulnerabilities which create character splits and dissociative phenomena in their wake One can wonder if therapists have avoided looking at shame because of its contagious qualities Human experience has demonstrated that shame is a ubiquitous emotion yet when individuals encounter shame it places them in a seemingly paradoxical position which looks much like a dissociated limbo state with no way out We experience it and yet don't experience it we see it and don't see it we feel it and don't feel it Therapists and mental health professionals cannot adequately treat unexamined shame from within its core unless he or she finds a compatible language for the theory that informs the interventions In particular the theory cannot replicate pre-existing splits embedded within a treatment paradigm and cannot be weighted with theoretical underpinnings that are distancing objectifying or removed The authors have proposed instead an innovative paradigm shifting model that is very explicit in recommending an experience near moment to moment immersion in the conflicted and often disoriented life of patients Unlike existing volumes in the field *Listening with Purpose* Entry Points into Shame and Narcissistic Vulnerability is by design replete with copious down to earth examples to help guide one's systemic shift in treatment focus treatment emphasis and treatment posture The shift involves healing on many levels and opens up for re-examination and re-assessment heretofore difficult to treat cases of trauma dissociation character disturbances and addictive disorders *Pediatric Annals*, 2005 [A Cop Doc's Guide to Public Safety Complex Trauma Syndrome](#) Daniel Rudofossi, Dale Lund, 2017-07-05 Cop Doc's Guide to Public Safety Complex Trauma Syndrome is written in response to the need for an advanced specialized guide for clinicians to operationally define

understand and responsibly treat complex post traumatic stress and grief syndromes in the context of the unique varieties of police personality styles The book continues where Rudofossi s first book Working with Traumatized Police Officer Patients left off Theory is wed to practice and practice to effective interventions with police officer patients The how and why of a clinician s approach is made highly effective by understanding the distinct personality styles of officer patients Rudofossi s theoretical approach segues into difficult examples that highlight each officer patient s eco ethological field experience of loss in trauma with a focus on enhancing resilience and motivation to otherwise left disenfranchised Thus this original work expands the ecological ethological existential analysis of complex PTSD into the context of personality styles with an emphasis on resilience without ignoring the pathological aspects of loss that often envelop officer patient trauma syndromes
