Transmedia Work Karin Fast, Andre Jansson, 2019-04-05 In *Transmedia Work* Karin Fast and Andr Jansson explore several key questions that frame the study of the social and cultural implications of a digital connected workforce How might we understand privilege and precariousness in today s digitalized work market What does it mean to be a privileged worker under the so called connectivity imperative What are the social and cultural forces that normalize the appropriation of new media in and beyond the workplace These key questions come together in the notion of transmedia work a term through which a social critique of work under digital modernity can be formulated Transmedia work refers to the rise of a new social condition that saturates many different types of work with various outcomes In some social groups and in certain professions transmedia work is wholeheartedly embraced while it is questioned and resisted elsewhere There are also variations in terms of control who can maintain a sense of mastery over transmedia work and who cannot Through interviews with cultural workers expatriates and mobile business workers and ancillary empirical data such as corporate technology and coworking discourse *Transmedia Work* is an important addition to the study of mediatization and digital culture

Extraterritorialities in Occupied Worlds Extraterritory Project, 2016 The concept of extraterritoriality designates certain relationships between space law and representation This collection of essays explores contemporary manifestations of extraterritoriality and the diverse ways in which the concept has been put to use in various disciplines Some of the essays were written especially for this volume others are brought here together for the first time The inquiry into extraterritoriality found in these essays is not confined to the established boundaries of political conceptual and representational territories or fields of knowledge rather it is an invitation to navigate the margins of the legal juridical and the political but also the edges of forms of representation and poetics Within its accepted legal and political contexts the

concept of extraterritoriality has traditionally been applied to people and to spaces In the first case extraterritorial arrangements could either exclude or exempt an individual or a group of people from the territorial jurisdiction in which they were physically located in the second such arrangements could exempt or exclude a space from the territorial jurisdiction by which it was surrounded The special status accorded to people and spaces had political economic and juridical implications ranging from immunity and various privileges to extreme disadvantages In both cases a person or a space physically included within a certain territory was removed from the usual system of laws and subjected to another In other words the extraterritorial person or space was held at what could be described as a legal distance In this respect the concept of extraterritoriality presupposes the existence of several competing or overlapping legal systems It is this notion of being held at a legal distance around which the concept of extraterritoriality may be understood as revolving

Hybrid Media Culture Simon Lindgren, 2013-10-30 The distinction between online and offline realities is becoming more and more difficult to sustain As computer mediated communication evolves and as interaction becomes more and more dependent on the Internet social cultural and political aspects begin to get caught and entangled in the web of contemporary digital communication technologies Digital tools and platforms for communication are progressively becoming commonplace while the cultural conceptions that surround these technologies immediacy constant accessibility availability are becoming increasingly mainstream Hybrid Media Culture is an interdisciplinary exploration of how the online and the offline interact in present day culture In the aftermath of all encompassing perspectives on postmodernisation and globalization there is now a pressing need for scholars of new media and society to come to terms with issues of place embodiment and materiality in a world of virtual flows and cyber culture This book explores ways of conceptualizing the intricate intermingling of the online and the offline through case studies of hybrid media places including user generated videos about self harm visibility surveillance and digital media digital communication tools and politics and physical and virtual churches This interdisciplinary edited collection investigates the effects of the internet and digital culture on perceptions and uses of identities bodies and localities It will be of interest to students and scholars of digital culture sociology media and communications studies new media body studies politics and science and technology studies
