The Possibility of Satan Alan McGill,2021-05-04 Can we know that Satan exists as a particular disembodied spirit Current Catholic teaching insists that Satan exists as a person a fallen angel who has instigated the Fall of humanity continues to influence humans today and constitutes a singular nemesis to God How one might ask could human beings know such a thing with certainty In response this book seeks to rescue the mythical language in which the doctrine of Satan is rooted so that it is freed from the unreasonable expectation that it affirms the existence of a particular creature and can instead express theological truth that is of relevance to all free willed creatures In doing so it addresses thorny questions concerning the interpretation of Scripture the relationship between God and evil between doctrine and truth between the Church and modernity and between the condemnatory impulses apparent in Christian thought and the doctrine of an omnipresent God of infinite mercy The book detects in the doctrine of Satan the expression of fundamental truths concerning the Creator creature relationship truths that are too easily obfuscated in current formulations that invite either fundamentalism or incredulity

Translation and the Classic Paul F. Bandia,James Hadley,Siobhán McElduff,2024-02-08 Through a range of accessible and innovative chapters dealing with a spectrum of genres authors and periods this volume seeks to examine the complex relationship between translation and the classic and how translation makes and remakes and sometimes invents classic works for new audiences across space and time Translation and the Classic is the first volume in a two volume series examining how classic works fare in translation how translation is different when it engages with classic texts and how classic texts can be shaped understood in new ways or even created through the process of translation

Although other collections have covered some of this territory they have done so in partial ways or with a focus on Greek Roman and Arabic texts or translations This collection alone takes the reader from 1000 BCE up to the digital age in a sequence of chapters that encompass areas including philosophy children s literature and pseudotranslation It asks us to consider translation not just as a mechanism of distribution but as one of the primary ways that the classic is created and understood by multiple audiences This book is essential reading for those taking Translation Studies courses at the senior undergraduate and postgraduate level as well as courses outside Translation Studies such as Comparative Literature and Literary Studies
