### *Antitrust in Data Driven Markets & Legal Framework for Influencers, Native*

*Advertising and Control over the Use of AI in Marketing* Bruce Kilpatrick, Pierre Kobel, Pranvera Këllezi, 2022-12-07 This book gathers contributions from a broad range of jurisdictions written by practitioners and academics alike and offers an unparalleled comparative view of key issues in competition law intellectual property and unfair competition law with a specific focus on the use of personal data The first part focuses on the role of competition law in shaping the digital economy It discusses the use of personal data the market power of platforms the assessment of free services and more broadly the responsibility of dominant companies in the smooth functioning of the digital economy In turn the second part sheds light on how the conduct of influencers native advertising and the use of AI for marketing purposes can be controlled by the law focusing on the use of personal data and the impact of behavioral advertising on consumers In this regard the book brings together the current legal responses across a number of European and other countries all summarized and elaborated on in the form of two international reports The LIDC is a long standing international association that focuses on the interface between competition law and intellectual property law including unfair competition issues      *Consumer Theories of Harm* Paolo Siciliani, Christine Riefa, Harriet Gamper, 2019-09-19 It has long been thought that fairness in European Consumer Law would be achieved by relying on information as a remedy and expecting the average consumer to keep businesses in check by voting with their feet This monograph argues that the way consumer law operates today promises a lot but does not deliver enough It struggles to avoid harm being caused to consumers and it struggles to repair the harm after the event To achieve fairness solutions need to be found elsewhere Consumer Theories of Harm offers an alternative model to assess where and how consumer detriment may occur and solutions to prevent it It shows that a more confident use of economic theory will allow practitioners to demonstrate how a poor standard of professional diligence lies at the heart of consumer harm The book provides both theoretical and practical examples of how to combine existing law with economic theory to improve case outcomes The book shows how public enforcers can move beyond the dominant transparency paradigm to an approach where firms have a positive duty to treat consumers fairly and shape their commercial offers in a way that prevents consumers from making mistakes Over time this fairness by design approach will emerge as the only acceptable way to compete      **EBOOK: The European Union: Economics, Policy and History** SENIOR, 2011-11-16 **EBOOK The European Union Economics Policy and History      **Regulating Vertical Agreements** Maria Fernanda Caporale Madi, 2020-10-09** Vertical agreements represent a variety of supply and distribution contracts involving different market players such as suppliers of diverse inputs manufacturers distributors and retailers They gain particular significance in a global economy where technological advances are dynamic and are changing all the time Such agreements are signed among businesspeople on a daily basis and antitrust experts around the world are often asked to advise on whether they have any negative impact on competition or whether they infringe antitrust law Taking into consideration the complex economic impacts of these vertical alliances and the different market conditions that firms face in a wide variety of situations the author proposes an in

depth examination of the following topics resale price fixing geo blocking clauses exclusive and selective distribution systems the concept of economic efficiency in the context of vertical restraints self assessment of potential anticompetitive effects and antitrust risks ex post control of vertical restraints digital economies and its policy impact alternative enforcement models under various institutional frameworks the role and influence of political pressure groups The book offers very constructive theoretical and political insights at the frontier between the disciplines of Economics and Law By comparing two world s leading antitrust jurisdictions this book explores the lessons to be learned from the legal rules in the European Union and in Brazil considering their promises and drawbacks and formulates policy recommendations **Algorithmic Antitrust**

Aurelien Portuese, 2022-01-21 Algorithms are ubiquitous in our daily lives They affect the way we shop interact and make exchanges on the marketplace In this regard algorithms can also shape competition on the marketplace Companies employ algorithms as technologically innovative tools in an effort to edge out competitors Antitrust agencies have increasingly recognized the competitive benefits but also competitive risks that algorithms entail Over the last few years many algorithm driven companies in the digital economy have been investigated prosecuted and fined mostly for allegedly unfair algorithm design Legislative proposals aim at regulating the way algorithms shape competition Consequently a so called algorithmic antitrust theory and practice have also emerged This book provides a more innovation driven perspective on the way antitrust agencies should approach algorithmic antitrust To date the analysis of algorithmic antitrust has predominantly been shaped by pessimistic approaches to the risks of algorithms on the competitive environment With the benefit of the lessons learned over the last few years this book assesses whether these risks have actually materialized and whether antitrust laws need to be adapted accordingly Effective algorithmic antitrust requires to adequately assess the pro and anti competitive effects of algorithms on the basis of concrete evidence and innovation related concerns With a particular emphasis on the European perspective this book brings together experts and scrutinizes on the implications of algorithmic antitrust for regulation and innovation
