Tomaiuolo,2004 Describes how to create a digital library of documents Hearing Loss Research at NIOSH National Research Council,Institute of Medicine,Board on Health Sciences Policy,Committee to Review the NIOSH Hearing Loss Research Program,2006-12-14 The National Institute for Occupational Safety and Health NIOSH was established by the Occupational Safety and Health Act of 1970 U S Congress 1970 Today the agency is part of the Centers for Disease Control and Prevention of the U S Department of Health and Human Services NIOSH is charged with the responsibility to conduct research experiments and demonstrations relating to occupational safety and health and to develop innovative methods techniques and approaches for dealing with those problems U S Congress 1970 Its research targets include identifying criteria for use in setting worker exposure standards and exploring new problems that may arise in the workplace Prevention of occupational hearing loss has been part of the NIOSH research portfolio from the time the agency was established A principal cause of occupational hearing loss is the cumulative effect of

years of exposure to hazardous noise Exposure to certain chemicals with or without concomitant noise exposure may also contribute to occupational hearing loss Hearing loss may impede communication in the workplace and contribute to safety hazards Occupationally acquired hearing loss may also have an adverse effect on workers lives beyond the workplace No medical means are currently available to prevent or reverse it although hearing aids are widely used and research on other treatments is ongoing Occupational hearing loss is a serious concern although the number of workers affected is uncertain In September 2004 NIOSH requested that the National Academies conduct reviews of as many as 15 NIOSH programs with respect to the impact and relevance of their work in reducing workplace injury and illness and to identify future directions that their work might take The Hearing Loss Research Program was selected by NIOSH as one of the first two programs to be reviewed Hearing Loss Research at NIOSH examines the following issues for the Hearing Loss Research Program

- 1 Progress in reducing workplace illness and injuries through occupational safety and health research assessed on the basis of an analysis of relevant data about workplace illnesses and injuries and an evaluation of the effect that NIOSH research has had in reducing illness and injuries
- 2 Progress in targeting new research to the areas of occupational safety and health most relevant to future improvements in workplace protection and
- 3 Significant emerging research areas that appear especially important in terms of their relevance to the mission of NIOSH

Preventing Teen Motor Crashes National Research Council,Transportation Research Board,Institute of Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Program Committee for a Workshop on Contributions from the Behavioral and Social Sciences in Reducing and Preventing Teen Motor Crashes,2007-01-23 From a public health perspective motor vehicle crashes are among the most serious problems facing teenagers Even after more than six months of being licensed to drive alone teens are two to three times more likely to be in a fatal crash than are the more experienced drivers Crash rates are significantly higher for male drivers and young people in the United States are at greater risk of dying or being injured in an automobile than their peers around the world In fact in 2003 motor vehicle crashes was the leading cause of death for youth ages 16 20 in the United States Understanding how and why teen motor vehicle crashes happen is key to developing countermeasures to reduce their number Applying this understanding to the development of prevention strategies holds significant promise for improving safety but many of these efforts are thwarted by a lack of evidence as to which prevention strategies are most effective Preventing Teen Motor Crashes presents data from a multidisciplinary group that shared information on emerging technology for studying monitoring and controlling driving behavior The book provides an overview of the factual information that was presented as well as the insights that emerged about the role researchers can play in reducing and preventing teen motor crashes

People of the Book T. Michael W. Halcomb,Timothy C. McNinch,2012-05-03 We live in an era when the Bible appears to be less and less relevant to mainstream cultures Those who do care about the Scriptures tend to derive their interpretations secondhand from the preacher s pulpit or from generalized study guides

written by complete strangers These approaches overlook the communal and conversational nature of the Bible itself If we hope to recover the transformative power of these ancient texts and invite our world to reconsider their significance we will need to engage whole communities together in the bottom up task of interpretation People of the Book was written to offer an organic holistic approach to communal interpretation an approach that can work for your community and appeal to your wider culture Halcomb and McNinch envision the Bible as a conversation we are privileged to enter listening questioning wrestling reasoning and responding together as authentic people of the Book Reinventing Writing Vicki Davis,2014-05-23 In this much anticipated book from acclaimed blogger Vicki Davis Cool Cat Teacher you ll learn the key shifts in writing instruction necessary to move students forward in today s world Vicki describes how the elements of traditional writing are being reinvented with cloud based tools Instead of paper note taking filing cabinets word processors and group reports we now have tools like ePaper eBooks social bookmarking cloud syncing infographics and more Vicki shows you how to select the right tool set it up quickly and prevent common mistakes She also helps you teach digital citizenship and offers exciting ways to build writing communities where students love to learn Special Features Essential questions at the start of each chapter to get you thinking about the big ideas A chapter on each of the nine essential cloud based tools ePaper and eBooks digital notebooks social bookmarking cloud syncing cloud writing apps blogging and microblogging wikis and website builders online graphic organizers and mind maps and cartoons and infographics A wide variety of practical ways to use each tool in the classroom Alignments to the Common Core State Standards in writing Level Up Learning a special section at the end of each chapter to help you review reflect on and apply what you ve learned Writing tips to help you make the best use of the tools and avoid common pitfalls A glossary of key terms discussed in the book Useful appendices including reproducible material for your classroom No matter what grade level you teach or how much tech experience you have you will benefit from Vicki s compelling and practical ideas As she emphasizes throughout this essential book teaching with cloud based tools has never been easier more convenient or more important than right now **Surface Transportation Environmental**

Research Transportation Research Board,2005-07-14 TRB Special Report 268 Surface Transportation Environmental Research A Long Term Strategy defines a broad and ambitious research program to address and inform major public policy debates about the effects of surface transportation facilities and operations on the human and natural environments The committee that conducted the study identified major gaps in knowledge that could be filled through a cooperative program of research involving federal agencies states and environmental organizations The committee recommended creation of a new cooperative research program to carry out its recommended research agenda Special Report 268 Summary Regulation of Weights, Lengths, and Widths of Commercial Motor Vehicles Transportation Research Board,2005-07-14 TRB Special Report 267 Regulation of Weights Lengths and Widths of Commercial Motor Vehicles recommends the creation of an independent public organization to evaluate the effects of truck traffic pilot studies of new truck designs and a change in federal law

authorizing states to issue permits for operation of larger trucks on the Interstates In 1991 Congress placed a freeze on maximum truck weights and dimensions Some safety groups were protesting against the safety implications of increased truck size and weight and the railroads were objecting to the introduction of vehicles they deemed to have an unfair advantage Railroads unlike trucking firms must pay for the capital costs of their infrastructure The railroads contend that large trucks do not pay sufficient taxes to compensate for the highway damage they cause and the environmental costs they generate Although Congress apparently hoped it had placed a cap on maximum truck dimensions in 1991 such has not proven to be the case Carriers operating under specific conditions have been able to seek and obtain special exceptions from the federal freeze by appealing directly to Congress without any formal review of the possible consequences thereby encouraging additional firms to seek similar exceptions In the Transportation Equity Act for the 21st Century Congress requested a TRB study to review federal policies on commercial vehicle dimensions The committee that undertook the study that resulted in Special Report 267 found that regulatory analyses of the benefits and costs of changes in truck dimensions are hampered by a lack of information Regulatory decisions on such matters will always entail a degree of risk and uncertainty but the degree of uncertainty surrounding truck issues is unusually high and unnecessary The committee concluded that the uncertainty could be alleviated if procedures were established for carrying out a program of basic and applied research and if evaluation and monitoring were permanent components of the administration of trucking regulations The committee recommended immediate changes in federal regulations that would allow for a federally supervised permit program The program would permit the operation of vehicles heavier than would normally be allowed provided that the changes applied only to vehicles with a maximum weight of 90 000 pounds double trailer configurations with each trailer up to 33 feet and an overall weight limit governed by the federal bridge formula Moreover enforcement of trucks operating under such a program should be strengthened and the permits should require that users pay the costs they occasion States should be free to choose whether to participate in the permit program Those that elected to do so would be required to have in place a program of bridge management safety monitoring enforcement and cost recovery overseen by the federal government The fundamental problem involved in evaluating proposals for changes in truck dimensions is that their effects can often only be estimated or modeled The data available for estimating safety consequences in particular are inadequate and probably always will be Thus the committee that conducted this study concluded that the resulting analyses usually involve a high degree of uncertainty What is needed is some way to evaluate potential changes through limited and carefully controlled trials much as proposed new drugs are tested before being allowed in widespread use The committee recommended that a new independent entity be created to work with private industry in evaluating new concepts and recommending changes to regulatory agencies Limited pilot tests would be required which would need to be carefully designed to avoid undue risks and ensure proper evaluation Special vehicles could be allowed to operate under carefully

controlled circumstances just as oversize and overweight vehicles are allowed to operate under special permits in many states Changes in federal laws and regulations would be required to allow states to issue such permits on an expanded network of highways under the condition that a rigorous program of monitoring and evaluation be instituted Special Report 269 Summary
