Networks of land managed for conservation across different tenures have rapidly increased in number and popularity in Australia over the past two decades. These include iconic large scale initiatives such as Gondwana Link, the Great Eastern Ranges Initiative, Habitat 141 and the South Australian NatureLinks as well as other landscape scale approaches such as Biosphere Reserves and Conservation Management Networks. Their aims have been multiple to protect the integrity and resilience of many Australian ecosystems by maintaining and restoring large scale natural landscapes and ecosystem processes to lessen the impacts of fragmentation to increase the connectivity of habitats to provide for species movement and adaptation as climate changes and to build community support and involvement in conservation. This book draws out lessons from a variety of established and new connectivity conservation initiatives from around Australia and is complemented by international examples. Chapters are written by leaders in the field of establishing and operating connectivity networks as well as key ecological and social scientists and experts in governance. Linking Australia's Landscapes will be an important reference for policy makers, natural resource managers, scientists and academics and tertiary students dealing with issues in landscape scale conservation, ecology, conservation biology, environmental policy, planning and management, social sciences, regional development, governance and ecosystem services.

Global Iconoclasm: Contesting "Official" Mnemonic Landscapes Michael Ripmeester, Matthew W. Rofo, 2024-06-24. Geographers and others have been long aware that landscapes are neither natural or neutral. This is particularly true of landscapes of memory. Powerful groups inscribe such landscapes with both a preferred vision of the past and with sets of idealized societal values and morals. Yet and despite the authoritative weight such landscapes carry they can be challenged. Even before the monument topplings of 2020 groups across the globe were challenging official memory discourses. This volume offers case studies of what might be considered global iconoclasm. Drawing upon original international case studies this monograph critically engages with and reveals the dynamics of landscape contestation. From the Tsunami Museum of Banda Aceh to the echoes of Mussolini's Fascist Italy by way of the decolonization of sites in Australia, New Zealand, Colombia and Africa the processes of landscape contestation are innovatively teased out by established and newly emerging scholars. This book should be of interest to any scholar interested in the politics of mnemonic landscapes.

**Grazing in Future Multi-scapes: From Thoughtscapes to Landscapes, Creating Health from the Ground Up** Pablo Gregorini, Iain James Gordon, Carol Kerven, Fred Provenza, 2022-09-27. This Research Topic is hosted in partnership with the Grazing in Future Multi Sapes international workshop. The workshop will be held online 30th May - 5th June 2021. Throughout different landscapes of the world grazing herbivores fulfill essential roles in ecology, agriculture, economies and cultures including families, farms and communities. Not only do livestock provide food and wealth they also deliver ecosystem services through the roles they play in environmental composition, structure and dynamics. Grazing as a descriptive adjective locates herbivores within a spatial and temporal pastoral context where they naturally graze or are grazed by farmers, ranchers, shepherds etc. In many cases however pastoralism with the single objective

of maximizing animal production and or profit has transformed landscapes diminishing biodiversity reducing water and air quality accelerating loss of soil and plant biomass and displacing indigenous animals and people These degenerative landscape transformations have jeopardized present and future ecosystem and societal services breaking the natural integration of land water air health society and culture Land users policy makers and societies are calling for alternative approaches to pastoral systems a call for diversified adaptive and integrative agro ecological and food pastoral systems designs that operate across multiple scales and scapes e g thought social land food health wild scapes simultaneously There needs to be a paradigm shift in pastoral production systems and how grazing herbivores are managed grazed within them derived initially from a change in perception of how they provide wealth The thoughtsapes will include paradigm shifts where grazers move away from the actual archetype of pastoralism future landscapes are re imagined and regenerative and sustainable management paradigms are put in place to achieve these visions From this will come a change in collective thinking of how communities and cultures socialscapes perceive their relationships with pastoral lands The landscapes are the biotic and abiotic four dimensional domains or environments in need of nurture Landscapes are the tables where humans and herbivores gain their nourishment i e foodscapes Foodscapes and dietary perceptions dictate actions and reactions that are changing as developed countries grapple with diseases related to obesity and people starve in developing countries Societies are demanding healthscapes and nutraceutical foodscapes and paradoxically some are moving away from animal products While indigenous species of animals including humans wildscapes have been displaced from many of their lands by monotonic pastoralism multifunctional pastoral systems can be designed in view of dynamic multi scapes of the future The purpose of this Research Topic is to influence future mental and practical models of pastoralism in continually evolving multi scapes We seek a collection of papers that will cultivate such a shift in thinking towards future models of sustainable multipurpose pastoralism The contributions will be synthesized to establish how multifunctional pastoral systems can be re imagined and then designed in view of the integrative dynamics of sustainable future multi scapes
