Annual Report of the Board of Bank Commissioners New Hampshire. Board of Bank Commissioners, 1922

Understanding the Farmer Field School agro-ecosystem analysis board Food and Agriculture Organization of the United Nations, 2021-10-27 The ecosystem literacy training employed in FFS is vital for enabling smallholder farmers to master the management skills required for sustainable crop production intensification and diversification This is radically different from the approach used by more traditional extension systems which are designed for technology transfer purposes

Agro Ecosystem Analysis AESA is the cornerstone of the field school approach and is based on the ecosystem concept in which each element at the crop farm field has its own unique role. It involves crops or commodity observations, data collection, analysis, interpretations or discussions and recommendations. Farmers use AESA method to understand the situation of crop ecosystem in the FFS approach. However, the method still included a reasonable level of complexity where the farmer has to deal with numeric and textual data. This remained a challenge for the facilitator to communicate with the farming community who cannot easily write and read the observations and perform analysis on a paper sheet and also in the presentation of the same AESA sheet. The New AESA Board is devised to mitigate the challenge of illiteracy and some other challenges in participatory group learning including the difference of age, education level, gender equality, wealth, position, social activism in the field school. The pre-designed AESA board provides equal opportunity to all participants including literate, illiterate or poor literacy services. This AESA board along with analytical color language named Jam s 4 Colors by FAO Pakistan remains among the top innovations of 2020.

The Roots of Low Achievement Sandra Stotsky, 2019-07-02. The chief purpose of this book is to explain how public education in this country became dysfunctional as a result of the education policies and programs funded by the federal government to address low academic achievement. It highlights student effort as a central factor in academic achievement based on research noting its significance. Teachers and school administrators cannot make children ready for college or career by grade 12 if their parents do not make them ready for school learning by kindergarten or grade 1. Once both the schools and students' parents together made students ready for membership in our civic culture. They learned they were politically equal to each other with a shared civic identity regardless of academic achievement. Yet policy makers at USED and philanthropists in this country with a professed interest in the education of low achievers want low achievers to believe that their academic status is all that matters and that they haven't succeeded academically because of bigoted teachers, administrators and communities. Parent-school partnerships need to revive their community's agreed upon mission for public education if we are to alter the roots of low achievement in this country.
