Shaping The Future of the Digital Economy Tech for Good Institute, 2023-12-01 This anthology of essays captures the perspectives of youth across Southeast Asia on the impact of technology on their economies and societies The book highlights

the basic requirements to realise technology's promise explore the transformative power of technology and how developments in specific sectors have impacted local communities. It also captures the very real anxieties about both the potential of technologies and the power wielded by those who develop, manage and control these technologies. *Navigating Peace and Sustainability in an Increasingly Complex World* Ayyoob Sharifi, John Lee Candelaria, Dahlia Simangan, Shinji Kaneko, 2024-11-16. This book, a sequel to a well-received book titled *Bridging Peace and Sustainability Amidst Global Transformations*, delves deeper into the entwined roots of peace and sustainability and emphasizes their interdependence. How are peace and sustainability interconnected and what key factors define the relationship between them? These questions were examined at the NERPS 2024 conference in Hiroshima and are central to our narrative. In this book, we explore the synergy of peace and sustainability through theoretical frameworks and real-world examples. We recognize that while the 2030 Agenda for Sustainable Development has acknowledged the link between peace and sustainability, a significant gap remains. Too often, efforts to promote peace and sustainability run parallel, never intertwining, losing the chance to bolster each other. We argue for merging the peace and sustainability agendas to confront contemporary challenges, calling for action to enhance and take advantage of their mutual reinforcement. Through diverse perspectives, this collection illuminates the social, economic, and environmental dimensions of this nexus, serving as a guide for policymakers, a reference for researchers, and a catalyst for dialogue among sectors committed to achieving the Sustainable Development Goals.

Sustainability Reporting and Blockchain Technology Harjit Singh, Neha Puri, Nandita Mishra, 2024-12-13 This book explores the much-talked-about but less-understood issue of sustainability reporting in a global context, linking it to the application of blockchain and other emerging technologies. It provides a transnational platform to examine the experiences of investors, researchers, academicians, and policymakers as they confront these concerns across a variety of industries and countries, thus offering best practice guidance to assess the technological landscape and to model sustainable business initiatives. It offers relevant theoretical frameworks and the latest empirical research findings. Further, it argues that in order to reduce carbon footprints globally by reporting all their emissions through a single blockchain platform, companies can create a standardized space for data to be collected and tracked reliably, allowing for meaningful measurements. The book benchmarks and analyses sustainability performance with respect to numerous laws, norms, codes, performance standards, and voluntary initiatives. It demonstrates how the organization influences and is influenced by expectations about sustainable development and emphasizes the link between financial and non-financial performance, enabling external stakeholders to understand the organization's true value along with tangible and intangible assets. It will enable readers to increase their understanding of the potential risks and opportunities and avoid environmental, social, and governance failures. The book provides insight into existing research practice and outcomes that could clarify and promote the state of the art on themes such as the drivers for sustainability reporting, Environmental, Social, and Governance goals, the influence of blockchain on sustainability reporting, as well as the issues and challenges. The book will be a useful guide for scholars, researchers, students, practitioners, regulators, and policymakers alike.
