**The New Digital Education Policy Landscape** Cristóbal Cobo, Axel Rivas, 2023-06-16 This book provides a scholarly investigation of the new era we have entered in which platforms can replace or profoundly modify educational systems and questions the role of educational policy in this new stage of platform-based digital technology. The contributors explore important questions around who controls these transformations, what form they are taking, what the balance between national education policies and Big Tech education solutions should be, as well as whether there should be a public platform in every education system that digitally expands learning, and what evidence there is that learning will be more efficient using these platforms. The first part provides a selection of empirical studies on the new digital educational policy and an analysis of the real opportunities and concerns that governments face in this regard, while the second offers reflections on the processes of platformization and the role of the state in this new digital world. Uniquely examining the temporal evolution of these changes and taking a theoretical, political, and epistemological approach, it crucially opens pathways for dialogical and diverse critical thinking about profound problems and possibilities. Gathering purposeful thinking that creates space for design solutions and rethinking educational systems, considering these new technological artefacts, it will appeal to researchers and specialists in the fields of educational technology and educational policy.

**Resources in Education** ,1992      **An Age of Accountability** John L. Rury,2023-10-13

An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
