*The World Politics of Social Investment: Volume II* Julian L. Garritzmann, Silja Häusermann, Bruno Palier, 2022 The World Politics of Social Investment consists of two companion volumes. The World Politics of Social Investment Volume I: Welfare States in the Knowledge Economy Volume I introduces social investment and develops a theory on the political and socio-economic conditions for the development of social investment policies around the globe. It studies the impact of the main explanatory factors on the empirical variety of social investment reforms and proposes a new typology of different welfare reform strategies. The World Politics of Social Investment Volume II: The Politics of Varying Social Investment Strategies Volume II traces the development of social investment reforms across the regions of Nordic Continental and Southern Europe, Central and Eastern Europe, North and Latin America, and North East Asia. Book jacket.

*The World Politics of Social Investment: Volume II* Julian L. Garritzmann, Silja Häusermann, Bruno Palier, 2022-05-18 The World Politics of Social Investment: Political Dynamics of Reform traces the development of social investment reforms across the regions of Nordic Continental and Southern Europe as well as Central and Eastern Europe, North and Latin America, and North East Asia. The chapters in this volume study the impact of different structural drivers for social investment, e.g. demographic, poverty, demand for skill, or lack of an available workforce; the salience of social investment in the public debates; and the different political coalitions that led to or prevented the adoption of social investment strategies.

Macroeconomic Analysis for Economic Growth Musa Jega Ibrahim, 2022-09-28 The book discusses the essential principles that guide macroeconomic policy formulation and implementation to stimulate strong economic growth for sustainable development, especially for emerging economies. It includes twelve chapters over three sections: Macroeconomics of Economic Growth, Labour Market and Employment, and The Financial System and Macroeconomic Performance. Key conclusions illustrate that the efficacy of regulatory frameworks to create enabling conditions for nurturing and bolstering robust value-adding production structures anchored on appropriate macroeconomic management are the fundamental building blocks of strong economic growth.

*Regulation in the European Electricity Sector* Maciej Sokołowski, 2016-02-22 Since the very beginning of European integration, electricity has been within the legal sphere of the EU. Much of this is found within the binding European acts making up the framework of the Energy Packages. The established legal institutions have had a significant impact on the shape of the energy market in Europe. Nevertheless, the European energy market still seems to be developing, as demonstrated by the current lively discussion about the state of the Energy Union. Regulation in the European Electricity Sector delves into European energy law and reflects on some of the primary issues related to the public legal impact on the European energy sector. The book offers a brief explanation of the

background operation of the electricity sector as well as liberalisation within the area and traces the evolution of the EU's approach towards the issue of public law regulation within the electricity sector. Finally, the book presents an analysis of European and national laws considering their interpretation and explores the future of public law regulation. Aimed at giving the reader a deep insight into a nature of the state's presence in the power sector, this book will be of great interest to students and scholars of EU energy law and policy.

**Bringing Forth Prosperity** Benjamin Bobo, 2022-09-01

Path to Capacity Innovation: An Africa MNC Strategic Alliance. A policy framework is advanced proposing a strategic alliance between African countries represented by NEPAD and the multinational corporation with input from the NGO and couched upon an NEPAD MNC NGO cross-fertilizing integrative structure. Capacity innovation is the key to Africa's transformation with the appropriate catalysts; innovation and transformation are but a matter of time in gestation. The first of two major catalysts necessary to prompting this change so long sought by Africans came at the adoption of the New Partnership for Africa's Development. It is one of the most profound collaborations of African Heads of State. The second catalyst is proposed in this work in the form of the multinational corporation as change agent for the innovation process working in alliance with NEPAD as Africa's spokesperson for innovation. The policy framework for African capacity innovation is the material product along with discourse for redress of corruption and security policy narrative for protecting the assets of multinational corporations. Bringing Forth Prosperity: Capacity Innovation in Africa questions capital theory as a development construct and an appropriate platform upon which sustained capacity innovation in Africa may emerge. It explores Africa's road to modernity in the context of selected development constructs and assesses capacity innovation from a top-down/bottom-up perspective purposely to serve as backdrop to the Africa MNC strategic alliance framework. It constructs country capacity ID to identify internal resources available to African countries to support capacity innovation, conceptualizes the Africa MNC strategic alliance to convey a capacity innovation philosophy, articulates an African capacity innovation policy framework to guide the Alliance through a series of actions designed to prompt innovation activity and set the continent on a course to sustained transformation and articulates a scheme to protect assets human and physical derived through the Africa MNC strategic alliance.

**Emerging Markets and the State** Christopher Wylde, 2017-07-27

This book, through an analysis of case studies in Latin America and Southeast Asia, sets out to understand the form and function of contemporary states seeking to guide and cajole markets hoping to stimulate economic growth and generate robust development outcomes. In the context of contemporary globalization and the hegemony of a neoliberal mode of capital accumulation, independent state-directed development has moved away from the reach of many emerging markets. Wylde's analysis reveals that, contrary to much of the literature espousing the end of the state, the role of the state in the 21st-century development process continues to be of pivotal importance.

expectations of government it shows that how one imagines Doomsday affects how one prepares for it Drawing on participant observation the author explores preppers views on the central question of whether to bug out or hunker down in the event of disaster and examines the ways in which the prepper economy increases revenue by targeting concerns over developing skills building networks securing equipment and arranging a safe locale A rich qualitative study Bracing for the Apocalypse will appeal to scholars of sociology and anthropology with interests in urban studies ethnography and subcultures Food, Masculinities, and Home Michelle Szabo, Shelley Koch, 2017-05-18 Long held associations between women home food and cooking are beginning to unravel as in a growing number of households men are taking on food and cooking responsibilities At the same time men s public foodwork continues to gain attention in the media and popular culture The first of its kind Food Masculinities and Home focuses specifically on food in relation to how homemaking practices shape masculine identities and transform meanings of home The international multidisciplinary contributors explore questions including how food practices shape masculinity and notions of home and vice versa the extent to which this gender shift challenges existing gender hierarchies and how masculinities are being reshaped by the growing presence of men in kitchens and food focused spaces With ever growing interest in both food and gender studies this is a must read for students and researchers in food studies gender studies cultural studies sociology geography anthropology and related fields **SME Internationalization Strategies** Noémie Dominguez, 2018-03-15 Internationalization is a strategic issue for companies as it is today the central axis for the development of small and medium sized enterprises SMEs Market expansion and the growing importance of emerging markets offer new development opportunities for SMEs to use innovative strategies such as head deck strategies to effectively penetrate these markets This book focuses on understanding these new strategies Why do SMEs use head of bridge strategies in order to internationalize How do they deploy such strategies abroad Based on the example of five manufacturing SMEs which are at different stages of internationalization this book highlights the main motivations stages of deployment but also difficulties encountered in this direction This book is a tool for assessing potential locations and provide managers with a new alternative in terms of internationalization enabling rapid identification of key stakeholders adapting their international development plan and anticipating potential pitfalls **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic

dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
