Considerations in Contact Lens Use Under Adverse Conditions National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Vision, Working Group on Contact Lens Use Under Adverse Conditions, 1991-02-01 This book summarizes current understanding of the scientific clinical and technical issues surrounding the use of contact lenses. It discusses the special occupational conditions experienced by military personnel particularly in extreme environments that give rise to the question of whether or not to use contact lenses. Experts in optometry, ophthalmology, visual psychophysics, and engineering describe recent developments in design and use, and representatives of the military services provide examples of actual situations in aerospace settings. Considerations in Contact Lens Use Under Adverse Conditions will be of particular interest to those involved in the design of contact lenses and those responsible for occupational safety and health matters in the private sector

Complicating, Considering, and Connecting Music Education Lauren Kapalka Richerme, 2020-05-05 In Complicating Considering and Connecting Music Education Lauren Kapalka Richerme proposes a poststructuralist inspired philosophy of music education. Complicating current conceptions of self, other, and place, Richerme emphasizes the embodied emotional and social aspects of humanity. She also examines intersections between local and global music making. Next, Richerme explores the ethical implications of considering multiple viewpoints and imagining who music makers might become. Ultimately, she offers that music education is good for facilitating differing connections with one's self and multiple environments. Throughout the text, she also integrates the writings of Gilles Deleuze and Félix Guattari with narrative philosophy and personal narratives. By highlighting the processes of complicating, considering, and connecting, Richerme challenges the standardization and career centric rationales that ground contemporary music education policy and practice to better welcome diversity.

Hard

Choices, Soft Law John J. Kirton, Michael J. Trebilcock, 2017-03-02 An important read for academics and policy makers alike. Hard Choices Soft Law asserts that voluntary standards or soft law are an important supplement to international law in a number of areas. This key work firstly outlines the approach taken to combining soft and hard law and trade environment and labour values in the WTO and NAFTA and in the prospective Millennium Round. Then, using the forestry sector, a realm where formal international law remains largely absent, the book provides a detailed examination of the role of soft law in action. It demonstrates how soft and hard law can be combined to promote trade, environmental and social cohesion in ways that also permit sustainable development. The book presents a wealth of knowledge from a range of contributors familiar with the work of the G7, G8, the OECD, the Biodiversity Convention and the Codex Alimentarius.
