Teaching Powerful Problem-Solving in Math Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22 Teaching Powerful Problem Solving in Math provides the first in depth portrait of schoolwide lesson study showing how U.S. teachers at several schools used it to implement powerful problem based mathematics instruction Students learn

mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it just as mathematicians would. By learning in this way, students discover the power of their own thinking and gain confidence that extends well beyond mathematics. This book introduces readers to urban elementary and K-8 schools where teachers have dramatically transformed math learning for teachers and for students. Readers will follow teachers as they transform instruction using schoolwide lesson study, building powerful new ways for educators to learn from each other and practice innovative teaching techniques. The authors use in-depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56%. Extensive resources and links are provided to help readers understand and build on the work of these schools, which is grounded in established principles of collective efficacy, intrinsic motivation, and learner agency for both students and teachers.

Book Features: Shows how teaching through problem solving can erase the achievement gap in mathematics learning. Provides the first in-depth portrait of schoolwide lesson study, showing how U.S. teachers at several schools build it and use it to transform teaching. Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards. Uses photographs, student work, and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school's work to build problem solving. Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons. Includes lesson plans, photographs of board work, student journals, school newsletters, self-assessment rubrics, and dozens of links to the resources needed to begin using teaching through problem solving and schoolwide lesson study. Provides long-term teacher-led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency.

Becoming the Math Teacher You Wish You'd Had
Tracy Johnston Zager, 2023-10-10

Ask mathematicians to describe mathematics, and they'll use words like playful, beautiful, and creative. Pose the same question to students, and many will use words like boring, useless, and even humiliating. *Becoming the Math Teacher You Wish You'd Had* author Tracy Zager helps teachers close this gap by making math class more like mathematics. Zager has spent years working with highly skilled math teachers in a diverse range of settings and grades and has compiled those ideas from these vibrant classrooms into this game-changing book. Inside, you'll find:

- How to Teach Student-Centered Mathematics
- Zager outlines a problem-solving approach to mathematics for elementary and middle school educators looking for new ways to inspire student learning.
- Big Ideas Practical Application: This math book contains dozens of practical and accessible teaching techniques that focus on fundamental math concepts, including strategies that simulate connection of big ideas, rich tasks that encourage students to wonder, generalize, hypothesize, and persevere, and routines to teach students how to collaborate.

Becoming the Math Teacher You Wish You'd Had offers fresh perspectives on common challenges, from formative assessment to classroom management for elementary and middle school teachers. No matter what

level of math class you teach Zager will coach you along chapter by chapter All teachers can move towards increasingly authentic and delightful mathematics teaching and learning This important book helps develop instructional techniques that will make the math classes we teach so much better than the math classes we took Adaptive Education Robert VanWynsberghe, Andrew Christopher Herman, 2016-05-12 The obstacles that prevent the latest educational research reaching the classroom are daunting few channels to communicate the results of educational research fewer opportunities for teachers to participate in research themselves and little support for honing a scientific approach to teaching The solution according to Robert VanWynsberghe and Andrew C Herman is radical but simple transform the educational institution itself into a laboratory for continuous experimentation Inspired by the pragmatist theories of John Dewey and Roberto Unger Adaptive Education explains how schools and universities can incorporate research processes into their activities institutionalize a policy of inquiry and experimentation and make teaching an evidence based profession An audacious proposal to reform the education system from the ground up Adaptive Education is a roadmap for creating an institution that empowers teachers parents and the community to innovate adapt and explore *Intelligent Computer Mathematics* Serge Autexier, 2008-07-16 This book constitutes the joint refereed proceedings of the 9th International Conference on Artificial Intelligence and Symbolic Computation AISC 2008 the 15th Symposium on the Integration of Symbolic Computation and Mechanized Reasoning Calculemus 2008 and the 7th International Conference on Mathematical Knowledge Management MKM 2008 held in Birmingham UK in July August as CICM 2008 the Conferences on Intelligent Computer Mathematics The 14 revised full papers for AISC 2008 10 revised full papers for Calculemus 2008 and 18 revised full papers for MKM 2008 plus 5 invited talks were carefully reviewed and selected from a total of 81 submissions for a joint presentation in the book The papers cover different aspects of traditional branches in CS such as computer algebra theorem proving and artificial intelligence in general as well as newly emerging ones such as user interfaces knowledge management and theory exploration thus facilitating the development of integrated mechanized mathematical assistants that will be routinely used by mathematicians computer scientists and engineers in their every day business Investing in Partnerships for Student Success Barry Leonard, 2000 *Arnold's Problems* Vladimir I.
