Antennas Designs for NFC Devices Dominique Paret, 2015 *Antenna Designs for NFC Devices* Dominique Paret, 2016-02-08 Near field communication NFC enables the exchange of information between close devices The antenna is the indispensable element to transform an electronic device into an NFC system For both theory and practice this book presents in detail the design technologies of different antennas They must meet the NFC ISO 18 092 and 21 481 standards as well as specifications by the NFC Forum for industrial applications by EMVCo for banking applications and payments and by CEN for public transport In a particularly pedagogic way *Antenna Designs for NFC Devices* enables designers of communicating object systems and the Internet of Things IoT to have access to the mysteries of the design of NFC antennas

Design Constraints for NFC Devices Dominique Paret, 2016-03-31 Near field communication NFC can appear to be a simple intuitive technology for exchanging data between close devices In reality these contactless structures that combine components and antennas must respect important and specific working constraints Illustrated by a number of detailed technological examples this book discusses the multiple normative ISO CEN NFC Forum EMVCo etc and regulatory ERC FCC ETSI radiofrequency private and ecological pollution etc constraints as well as the applied typological functional structural environmental or interoperability constraints that a NFC device might face *Design Constraints for NFC Devices* also presents techniques that enable us to free ourselves from the technological constraints of current NFC operations encountered in banking public transport administration automotive industrial communicating object and Internet of Things applications

UHF RFID Technologies for Identification and Traceability Jean-Marc Laheurte, Christian Ripoll, Dominique Paret, Christophe Loussert, 2014-09-09 UHF Radio Frequency Identification RFID is an electronic tagging technology that allows an object place or person to be automatically identified at a distance without a direct line of sight using a radio wave exchange Applications include inventory tracking prescription medication tracking and authentication secure automobile keys and access control for secure facilities This book begins with an overview of UHF RFID challenges describing the applications markets trades and basic technologies It follows this by highlighting the main features distinguishing UHF 860MHz 960MHz and HF 125 kHz and 13 56 MHz identifications in terms of reading range environmental sensitivity throughput and safety The architecture of the integrated circuits and the organization of the memory are then described One chapter is devoted to the air interface protocol aspects including coding modulation multi readers operation and anti collision algorithms to manage the tag responses Focus will be put upon the EPC Gen2 protocol adopted in the ISO 18000 Part 6 The core of the book will cover the design and manufacturing issues of RFID tags The influence of the propagation medium warehouse libraries etc the tag close environment bottles linens containers carton boxes etc and the coupling between tags will also be carefully addressed The final chapter is dedicated to an industrial use case in the supply chain management either in the retail inventory or blood traceability **Secure Connected Objects** Dominique Paret, Jean-Paul

Huon,2017-05-16 In this book the authors focus on the concrete aspects of IoT Internet of Things the daily operation on the ground of this domain including concrete and detailed discussion of the designs applications and realizations of Secure Connected Things and IoT As experts in the development of RFID and IoT technologies the authors offer the reader a highly technical discussion of these topics including the many approaches technical security safety ergonomic economic normative regulations etc involved in Secure Connected Objects projects This book is written both for readers wishing to familiarize themselves with the complex issues surrounding networking objects and for those who design these connective things
