Persian Royal-Judaean Elite Engagements in the Early Teispid and Achaemenid Empire Jason M. Silverman, 2019-11-14

Jason Silverman presents a timely and necessary study advancing the understanding of Achaemenid ideology and Persian Period Judaism. While the Achaemenid Persian Empire c. 550-330 BCE dwarfed all previous empires of the Ancient Near East in both size and longevity, the royal system that forged and preserved this civilisation remains only rudimentarily understood, as is the imperial and religious legacy bequeathed to future generations. In response to this deficit, Silverman provides a critically sophisticated and interdisciplinary model for comparative studies. While the Achaemenids rebuilt the Jerusalem temple, Judaean literature of the period reflects tensions over its Persian re-establishment, demonstrating colliding religious perspectives. Although both First Zechariah 1:8 and Second Isaiah 40:55 are controversial, the greater imperial context is rarely dealt with in depth; both books deal directly with the temple's legitimacy and this ties them intimately to kings' engagements with cults. Silverman explores how the Achaemenid kings portrayed their rule to subject minorities, the ways in which minority elites reshaped this ideology, and how long this impact lasted as revealed through the Judaean reactions to the restoration of the Jerusalem temple.

"Good Observers of Nature" Tina Gianquitto, 2007. In *Good Observers of Nature*, Tina Gianquitto examines nineteenth-century American women's intellectual and aesthetic experiences of nature and investigates the linguistic, perceptual, and scientific systems that were available to women to describe those experiences. Many women writers of this period used the natural world as a platform for discussing issues of domesticity, education, and the nation. To what extent, asks Gianquitto, did these writers challenge the prevalent sentimental narrative modes like those used in the popular flower language books and use scientific terminology to describe the world around them? The book maps the intersections of the main historical and narrative trajectories that inform the answer to this question: the changing literary representations of the natural world in texts produced by women from the 1820s to the 1880s and the developments in science from the Enlightenment to the advent of evolutionary biology. Though Gianquitto considers a range of women's nature writing—botanical manuals, plant catalogs, travel narratives, seasonal journals, scientific essays—she focuses on four writers and their most influential works: Almira Phelps' *Familiar Lectures on Botany* (1829), Margaret Fuller's *Summer on the Lakes in 1843*, Susan Fenimore Cooper's *Rural Hours* (1850), and Mary Treat's *Home Studies in Nature* (1885). From these writings emerges a set of common concerns about the interaction of reason and emotion in the study of nature, the best vocabularies for representing objects in nature, local scientific or moral and the competing systems for ordering the natural world, theological, taxonomic, or aesthetic. This is an illuminating study about the culturally assumed relationship between women, morality, and science.

**Human Extinction** Émile P. Torres, 2023-06-15. This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks. known works are *Walden* and *Walking In* this book Lester Hunt shows that his writings have a compelling philosophical dimension as well Thoreau seldom argues for his ideas the way other philosophers do Rather than setting up proofs designed to trap the reader into agreeing with him he challenges the reader by means of narratives jokes questions and paradoxes to recognize possibilities previously unknown and unexplored Thoreau's own explorations led him to several distinctively philosophical theories an intuitionist metaethics an ethics based on virtue and self realization a politics that is fundamentally individualist and anarchist and a secular religion in which nature is pre eminent The New Princeton Companion Robert K. history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet
