Commonsense and the Theory of International Politics John C. Garnett, 1985-06-30 International politics is not a cumulative subject in which the latest book makes all the others obsolete The assumption underlying these pages is that our understanding of international politics is more likely to be improved by reflecting upon and reworking what we already know about the subject than by topping up our knowledge with either more detailed research or more contemporary analysis Each of the chapters deals with a different aspect of international theory A discerning reader may become aware of certain unifying threads running through and linking all of the chapters They have all been written out of a conviction that explanation and not prescription is the only proper role of the political scientist and they all reflect my skepticism about the scientific nature of international politics John C Garnett In a refreshing and clear analysis Dr Garnett looks at the nature of international theory and the problems associated with its development Drawing from many disciplines he examines fundamental questions in a new way giving a measure of commonsense to a subject which has become complicated and esoteric His use of analogies and quotations bring his subject alive in a study that will be of interest to those involved in both the social sciences and politics

Seeing Whole Asbjørn Grønstad,Mark Ledbetter,2016-02-08 *Seeing Whole Toward an Ethics and Ecology of Sight* explores the ways in which seeing as an embodied process is always a multivalent ambiguous and holistic undertaking Looking at an image entails the mobilization of a range of affordances that together produce sight and insight as a phenomenological experience namely cultural predispositions geographical situatedness medium specificity personal biography socio political relationality and corporeal affectibility In their own diverse ways the essays in this book suggest that acts of seeing make up a visual ecology that in turn introduces a new ethical horizon distinct from but in continuous interaction with conventional ethics Spanning a great variety of media forms from painting and photography to film video literature fashion graffiti and installation art this interdisciplinary collection offers a thorough reconceptualization of the relation between the aesthetics and the ethics of images and represents an innovative addition to the field of visual culture studies
